Institute, 1982 Review of Soviet military thinking ed Derek Leebaert and Soviet perceptions of military power by John J Dziak

Learning from Foreign Wars Gudrun Persson, 2011-03 Learning from Foreign Wars examines how the Russian army interpreted and what lessons it learned from the wars in Europe between 1859 and 1871 and the American Civil War This was a time marked by rapid change political social economic and technological By raising the question of learning from foreign wars the author attempts to fill a gap in the historiography of the Russian army The army was one of the pillars on which the Russian regime built its power and it was crucial for the survival of the regime both in domestic and foreign affairs The reactions and thinking of the military at a time of rapid social political economic and technological change therefore tell a lot about the regime's ability to adjust develop and ultimately survive Furthermore the influence of foreign wars on Russian strategic war planning is analyzed with the use of the first Russian war plan of 1873 and the proceedings from the strategic conference chaired by Alexander II in 1873 The influence of foreign wars on the General Staff officer education is also investigated This book is largely based on extensive research in Russian archives Special attention is given to the military attachés and thus the author fills a gap in the historiography of the Russian army It uncovers the development of the military attaché institution with the use of new archival material The Russian military attaché reports from the European Great Powers 1859-71 and the observer reports from the different theaters of war are also examined In addition extensive use has been made of the military press and contemporary military literature with regard to the wars **The Third World in Soviet Military Thought** Mark Katz, 2012-07-26 First published in 1982 this study traces the development of Soviet military thinking on the Third World and assesses its importance for the conduct of Soviet foreign policy Changes in Soviet military thought often reflect changes in Soviet attitudes towards and expectations from involvement in Third World conflicts This work from Dr Katz meditates upon the changing role of the USSR in post war Third World conflicts with particular emphasis upon the Brezhnev era and the way in which US setbacks in the Third World impacted upon Soviet foreign policy and

traces the development of Soviet military thinking on the Third World and assesses its importance for the conduct of Soviet foreign policy Changes in Soviet military thought often reflect changes in Soviet attitudes towards and expectations from involvement in Third World conflicts This work from Dr Katz meditates upon the changing role of the USSR in post war Third World conflicts with particular emphasis upon the Brezhnev era and the way in which US setbacks in the Third World impacted upon Soviet foreign policy and changing attitudes to the Third World *Russian Military Thought* Gudrun Persson,2025-11-03 Novel insights into Russian military thought from the Crimean War to the war in Ukraine The development of the Russian military s strategic thought is an understudied and thus misunderstood subject in the West Strategy in Russia encompasses the broader context of foreign and domestic policy as well as the military s ties to the country s leadership The military s strategic thought is closely linked to Russia s existence as a state and explains patterns of Russian confrontation In *Russian Military Thought* the renowned scholar Gudrun Persson offers novel insights into Russian military thought on doctrine and strategy from the Crimean War to Russia s full scale invasion of Ukraine Persson dismantles the simplistic notion that Russian military thought is backward instead presenting a deeper analysis of the drivers that influence the changes in Russian military strategy Through archival research based on Russian language sources Persson offers a multidisciplinary perspective drawing on theoretical insights from history and political science that enable her to make a nuanced qualitative analysis This book will be essential reading for practitioners scholars and students who seek to understand the mind set of the current Russian leadership and the constraints that shape Russia s future possibilities

Counter-blows in Russian Military Thinking Charles Dick,Royal Military Academy, Sandhurst. Soviet Studies Research Centre,1992 **Deterrence and the Revolution in Soviet Military Doctrine** Raymond L. Garthoff,1990 In this book

Soviet expert Raymond L Garthoff makes use of unique newly available material including a complete file of the confidential Soviet General Staff journal to illuminate the development of Soviet military thinking *Soviet Strategic Thought, 1917-91* Andrei A. Kokoshin,1998-01-15 During the Cold War Westerners were obsessed with the military policies of the Soviet Union Until the demise of the Soviet Union however few details of Moscow s thinking on military matters were available In this book Andrei Kokoshin reveals how Soviet military theorists developed and debated the concepts that provided the basis for the Kremlin s defense policies Drawing on Soviet era archives and unpublished materials he sheds light on this important chapter in the history of Russia and the world The book covers three main themes the relationship between politics and military strategy in the Soviet Union how the Soviet political and military leadership assessed threats to Soviet security the

nature of future wars and methods of warfare and the relationship between offense and defense in Soviet military strategy Kokoshin places the strategic concepts behind Moscow's military policies in the context of internal and international struggles for power and assesses the future role of military power in Russia's national security strategy

The Russian Way of War Richard W. Harrison, 2001 In this first comprehensive treatment of the subject Richard Harrison shows how this theory emerged and developed to become despite radically different political settings and levels of technology essential to the Red Army's victory over Germany in World War II

Soviet Military Thought, 1977

The Russian Military Today and Tomorrow Stephen Blank, Richard Weitz, 2010-07-30 The essays in this volume represent both a memorial and an analytical call to action We have brought these authors and their essays together in memory of our colleague Mary Fitzgerald of the Hudson Institute who passed away far too soon on April 5 2009 Mary was one of the most brilliant and vivacious practitioners of the study of the Russian and Chinese militaries whose insights helped not just to put those fields of study on the map but also to influence U.S. military thinking Her work helped shed light on the concrete meaning of such terms as the Revolution in Military Affairs (RMA) as well as the profoundly original works of thinkers like Marshal Nikolai Ogarkov 1917-94 who was both Chief of the Soviet General Staff 1977-84 and an outstanding military thinker who coined that term

1 As the Dedication by Andrew Marshall points out the influence that terms like the RMA and the concepts surrounding them that Ogarkov developed influenced 20 years of U.S. and European thinking from 1980-2000 about the conduct of war This achievement alone would suffice to merit lasting respect and admiration from her colleagues All the authors here worked with or were influenced by Mary's contributions But a memorial should be a living thing not just a eulogy which is soon forgotten In analytical terms it is also a call to action a continuing insistence that it is essential for the scholarly professional and policymaking communities not only to take into account Russian military developments but also the military thinking that animates many of those developments Just as Soviet military thinking was arguably the most profound of all military thinking during the interwar period of the 1920s and 1930s so today we both as scholars and professional actors would benefit considerably from paying serious attention to the contemporary corpus of Russian thinking about warfare Indeed it can be argued that the U.S. military won one of its greatest victories in 1991 in Operation DESERT STORM precisely by assimilating and then operationalizing concepts laid out by Ogarkov and his contemporaries as well as the lost generation of Soviet thinkers like Marshal Mikhail Tukhachevsky 1891-1937 and Colonel Alexander Svechin 1878-1938

2 The serious study of current Russian thinking will benefit policymakers and military professionals alike both on its own merits and by virtue of the ongoing importance of Russia as a strategic factor in world politics Unfortunately the study of this important subject is in danger of being buried along with one of its most gifted practitioners Western interest in this field sharply declined after the fall of the Soviet Union and the end of the Cold War To many the issues and questions involved in this field not to mention the effort connected with obtaining funding for such study seemed to be irrelevant and not worth the time spent in doing so Yet

recent events have shown that this approach is seriously misguided and involves major costs to the United States and its allies. Of course it is by now a truism to say that the Russo-Georgian war of 2008 demonstrated to all observers that Russia was back if they had not realized that before. But in fact, as Stephen Blank points out in Chapter 2, Russian military and political leaders well before then believed that Russia was at risk in both military and nonmilitary ways. Some went so far as to say that the country was in effect already in an information war against the West.³ We often underestimate the impact of the Russian leadership's perception that Russia is intrinsically at risk and in some sense under attack from the West. That underestimation leads us astray conceptually but also politically.
