L. Hamilton,W. Burriss,1972 **Space Power Theory** JUDSON J. JUSELL,2025-05-22 Is there a single comprehensive theory that could shape future space and air forces This essay examines the current state of space power theory The method of research was a literature review of books periodicals government and private reports and conference proceedings via Air University Library and the Internet as well as personal contact with faculty members from several military schools This effort identified basic elements of military theory definitions explanations and predictions which then became a qualification as well as a framework for this paper The major findings of this paper are that 1 Space power theory is emerging it exists and is growing in the form of definitions explanations and predictions of the nature significance and functioning of systems in space 2 A single comprehensive space power theory does not exist and 3 Space power theory has much room for improvement in its definitions explanations and predictions of space power Finally this paper recommends that future theorists 1 Expand all areas of space power theory to create a more robust body of literature 2 Thoroughly examine the contributions of early space theorists see Chapter 3 Note 1 3 Address in detail the two hot topics in space power theory today space control and space force organization and 4 Seek a single comprehensive space power theory to bring together the lasting ideas of space power for the purpose of shaping future space forces This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *Electric Light and Power* Arthur Frederick Guy,1894 *Whither Space Power?* Simon P. Worden,John E. Shaw,2005-01-01 The influence of space power pervades almost every sphere and level of human existence from politics to military affairs to commercial activities to cultural mind sets Yet there is little to be found today in the way of coherent space power doctrine and strategy particularly in national security circles To what extent do our national interests rely on space How shall we defend our interests in space and how shall we deny our adversaries the benefits of space power in time of conflict How can we control and exploit the space environment How can we effectively wield space power against the full spectrum of threats from the lone terrorist to global peer competitors What should be our long range strategy and objectives

if our goal is to achieve and maintain long term space superiority The purpose of this paper is two fold first to illuminate the historical and ever increasing importance of space in modern society and second to prescribe in view of this importance the foundations of a strategy for achieving lasting space superiority and ensuring national and world security
