Sustainable Approaches in Textiles and Fashion Subramanian Senthilkannan Muthu,2022-03-29 This fourth volume in the series presents various sustainable approaches in the textile and fashion sector with a focus on manufacturing processes and chemicals Sustainability is one of the important aspects in today s industrial context which is followed by every industrial sector with no exception to textiles and fashion Sustainability and strict adherence to the principles of sustainability has become as one of the essential needs again for any industrial sector including textiles and fashion There are countless measures in terms of various approaches to make the textiles and fashion sector sustainable These measures but not limited to ranging from innovating and implementing new fibres and raw materials introducing innovative manufacturing methods chemicals processes to focus on all the possible stages of a textile product s life cycle from cradle to grave These approaches include making the textiles and fashion sector circular and also development of new products from sustainable raw materials processes or combination of both

Textiles Steve Parker,2002 Discusses various natural and artificial fibers that are used to produce cloth and examines processes used to transform those fibers into clothing household items and technological devices

Fundamentals of Natural Fibres and Textiles Md. Ibrahim H. Mondal,2021-03-20 The textile industry is focused in its search for alternative green fibres with the aim of providing high quality products which are fully recyclable and biodegradable Natural textile materials from renewable sources play an increasingly important role in the industry due to their unique properties and functionality over synthetic fibres as well as their sustainability Fundamentals of Natural Fibres and Textiles covers all the fundamental and basic information about natural fibres and textiles Many different fibres are covered from their origin through processing properties and applications The latest methods for characterisation and testing of natural fibres are all addressed with reference to cutting edge industry trends This uniquely comprehensive approach to the topic provides the ideal entry point to natural fibres for textile and clothing scientists engineers designers researchers students and manufacturers of such products Explains the characteristics of natural fibres to show how they compare to synthetic fibres for a range of purposes Provides an overview of the environmental impact of the processing of fibres and how this creates industrial waste Covers a wide range of natural fibres in detail from traditional silk and wool to electrospun biopolymers Provides the latest updates on technologies for designing natural fibres and applying them to the development of new products
