

TEXTUAL ANALYSIS

Textual analysis is a method used to interpret and understand written or spoken language to gain an understanding of meanings produced through text.

OVERVIEW

Textual analysis involves examining the structure, content, and context of a text to uncover its underlying meanings, themes, and patterns. This process typically involves identifying key ideas, analyzing the rhetorical strategies employed, and considering the cultural, historical, and social factors that may have influenced the text's creation.

EXAMPLE

- **Analysis of policy documents:** A scholar could analyze the policy documents of public companies to determine the evolving ways in which they approach, define, and prioritize Environmental and Social Responsibility as a key value of the companies. This could involve methods like thematic coding and word frequency analysis.

Textual Strategies:

Textual Strategies Josue V. Harari, 2019-06-30 A stellar cast of fifteen contributors seeks to show the direction in which continental and continentally oriented American literary criticism has evolved in recent years. Nine of the essays are published here for the first time; five of the remaining six were translated by the editor from the French; only one has previously appeared in English. The essays make available some of the most important and most representative work that has been done in the wake of structuralism. Among the topics treated are the relationships between semiology and literature, anthropology and literature, and psychoanalysis and literature; modern American poetics; algebraic models as epistemological operators; the modes of production of a poem; Flaubert's view of history and poetic language. Professor Harari has arranged the essays to move from the general to the particular and from the abstract to the concrete. In an informative and ambitious introduction, he discusses each essay in relation to the whole and explains the interrelationships among the various theories and strategies that are represented in the anthology. A book meant for the specialist as well as the novice, for the teacher of literature and criticism as well as the student. **Textual Strategies** is a brilliant introduction to post-structuralist critical theories and practices.

Textual Strategies Josué V. Harari, 1984 **Textual Strategies in Ancient War Narrative**, 2018-11-26 In this collected volume, fourteen experts in the fields of Classics and Ancient History study the textual strategies used by Herodotus and Livy when recounting the disastrous battles at Thermopylae and Cannae. Literary, linguistic, and historical approaches are used often in combination in order to enhance and enrich the interpretation of the accounts, which for obvious reasons confronted the authors with a special challenge. Chapters drawing a comparison with other battle narratives and with other genres help to establish genre-specific elements in ancient historiography and draw attention to the particular techniques employed by Herodotus and Livy in their war narratives.

Victims, Textual Strategies in Recent American Fiction Paul Bruss, 1981 Beginning with the general cultural impact of scientific discovery on literature and painting at the turn of the century, Bruss discusses the works of Nabokov, Barthelme, and Kosinski with special attention paid to the ways in which these authors respond to the increasing lack of literature's textual authority.
