Committee on the Territories, 1912 Global Land Use Intensity Change and Its Impact on Food Security Xueru Zhang, Wei Song, Jinmei Lu, Basanta Paudel, Q. Yuan, 2025-09-18 Food security is an important guarantee for world peace and development and has a bearing on the sustainable development and future destiny of humankind The 2023 State of Food Security and Nutrition in the World report released by the Food and Agriculture Organization of the United Nations FAO shows that between 691 and 783 million people worldwide were hungry in 2022 Although the increase in the number of hungry people in the world has slowed down there are still many regions of the world that are sinking deeper into the food crisis If left unchecked the world will not be on track to meet the Sustainable Development Goal of eradicating hunger by 2030 Food security continues to be a

global challenge Food security is based on the food system and when the food system is under stress the level of food security is reduced This stress comes from a variety of factors including land use change Land use change and its impacts have become a hotspot and frontier of global change research With the development of human society the structure depth and intensity of land use are constantly changing which directly affects the issue of food security There is a close relationship between regional food security and land use change This Research Topic focuses on land use intensity change and its implications for food security
