Working With Offenders:

Probation Rob Canton,2013-03-01 This book provides a comprehensive and accessible introduction to the work of the probation service It brings together themes of policy theory and practice to help students and practitioners to better understand the work of probation its limitations as well as potential but above all its value Setting probation in the context of the criminal justice system the book explores its history purposes and contemporary significance It explains what probation is discusses emerging ideas around offender management and the value of an approach that centres on the idea of desistance It considers the practice realities of working with offenders in the community The book also covers the governance of probation and how policy and practice are responding to contemporary concerns about crime and community safety for example through the management of risk Although the main focus is on England and Wales there is some discussion of other UK jurisdictions and of contemporary trends in European probation practices This book will encourage readers to appreciate the practical and theoretical strengths and shortcomings of contemporary probation practice Information and discussion are presented clearly with guidance about further study and pointers towards more specialized readings *Probation Working with Offenders* will be essential reading for trainee probation officers and students of probation and offender management

Working with Offenders Robert Douglas White,Hannah Graham,2010 This book provides a theoretically informed guide to the practice of working with offenders in different settings and for different purposes It deals with topics such as offender rehabilitation case management worker offender relationships working with difficult clients and situations collaboration addressing complex needs and processes of integration The book offers a unique perspective on working with offenders in that it incorporates three key elements As part of the latter it provides different types of data including descriptions of programs and selected statistics from each jurisdiction and presents this information in easy to read formats The chapters are structured around a dual focus of workers and their environments on the one hand and the nature of the offenders with whom they work on the other The condition and situation of workers is thus considered in the context of the condition and situation of offenders and the relationship between the two The book is intended to be relevant and familiar to those already working in the field as well as to introduce contemporary principles and practices to those wishing to do so in the future Each chapter concludes with two key features The first Further Reading is oriented toward concepts and the why questions of practice The second Key Resources alerts readers to appropriate manuals and handbooks and the how questions of practice This includes reference to evidence based examples of good practice and specific intervention models *What Works (and Doesn't) in Reducing Recidivism* Edward J. Latessa,Shelley J. Listwan,Deborah Koetzle,2014-09-19 This book offers criminologists and students an evidence based discussion of the latest trends in corrections Over the last several decades research has clearly shown that rehabilitation efforts can be effective at reducing recidivism among criminal offenders However researchers also recognize that treatment is not a one size fits all approach Offenders vary by gender age

crime type and or addictions to name but a few and these individual needs must be addressed by providers Finally issues such as leadership quality of staff and evaluation efforts affect the quality and delivery of treatment services This book synthesizes the vast research for the student interested in correctional rehabilitation as well as for the practitioner working with offenders While other texts have addressed issues regarding treatment in corrections this text is unique in that it not only discusses the research on what works but also addresses implementation issues as practitioners move from theory to practice as well as the importance of staff leadership and evaluation efforts
