The World According To Pimm: A Scientist Audits the Earth Stuart Pimm, 2001-08-10 Take a globe circling tour of our endangered planet with conservation biologist Stuart Pimm who is taking stock and keeping score We use 50 percent of the world's freshwater supply We consume 42 percent of the world's plant growth We are liquidating animals and plants 100 times faster than the natural rate of extinction Such numbers should make it clear that the human impact on our planet has been and continues to be extreme and detrimental Yet even after decades of awareness of our environmental peril there remains passionate disagreement over what the problems are and how they should be remedied Much of the impasse stems from the fact that the problems are difficult to quantify How do we assess the impact of habitat loss on various species when we haven't even counted them all And just what factors go into that 42 percent of biomass we are hungrily consuming It is only through an understanding of the numbers that we will be able to break that impasse and come to agreement Working on the front lines of conservation biology Stuart Pimm is one of the pioneers whose work has put the science in environmental science In this book he appoints himself investment banker of the global biological accounts checking the numbers gathered by tireless scientists in work that is always painstaking and often heartbreaking Pimm explains the numerical results in lucid prose With wit passion and candor he reveals the importance of understanding where those numbers come from and what they mean To do so he takes the reader on a globe circling tour of our beautiful but weary planet With Pimm as our indomitable guide we travel from the volcanic mountains and rainforests of Hawaii to the boreal forests of Siberia We see a blue whale off the Pacific coast of Mexico where the blue oceans are slowly turning to barren deserts We go birdwatching high up in the leafy canopy of the Amazon from which we can see the hundreds of smoke plumes busily working at deforestation At times the view looks rather grim But Pimm is no Cassandra he never preaches or scolds Ever optimistic this book presents a world filled with mysterious beauty the infinite variety of nature and an urgent hope that through an understanding of our planet's environmental past and present we will be inspired to save it from future extinction This book is unashamedly optimistic It is a celebration of our spectacular and fascinating world I have made no attempt to restrain my joy as I encounter its natural history and its peoples By the time you read the Epilogue you will know that our world is not doomed it is not fatally wounded but neither is it healthy It needs attention Stuart Pimm from the Prologue *Origins of the Universe, Life and Species* Plammoottil Cherian, 2018-03-22 The relationship between science and theology has been a crisis for humanity since Darwin's publication of *Origin of Species* that affects the very core of scientific and Biblical truths with serious consequences In this detailed and absorbing book Dr Cherian provides astounding facts of science that were

deciphered in the last 500 years each of which is recorded in the Biblical Scriptures Heeding back to the Biblical account of creation Dr Cherian takes the readers from the erroneous notion of the origin of the universe without a cause and abiogenesis as the source of life to the latest scientific discoveries that corroborate the Biblical evidence for divine creation of the universe life and species that dispel Darwinian evolution The Origins of the Universe Life and Species sheds much light for a better understanding of the Scriptures that were hidden to many scientists researchers and students to relate the scientific discoveries that reveal the Biblical truths for a better appreciation of the unknown God who reveals himself through the many scientists and their discoveries Dr Cherian uses all branches of science from astronomy to zoology connecting the dots between science and theology that stretches from the highest of heavens outer space to the deepest of ocean floor revealing the unknown God to be the KNOWN GOD
