Wildfires kill many animals but are populations of animals affected How do animals survive the passage of fire Why do some
tree species survive and others die in a fire Do frequent fires cause changes in plant community composition Answering
questions such as these requires an understanding of the ecological effects of fire Aimed at senior undergraduate students
researchers foresters and other land managers Dr Whelan s book examines the changes wrought by fires with reference to
general ecological theory The impacts of fires on individual organisms populations and communities are examined separately
and emphasis is placed on the importance of fire regime Each chapter includes a listing of outstanding questions that identify
gaps in current knowledge The book finishes by summarising the major aspects of ecology that are of particular relevance to
management of fires both protection against wildfires and deliberate use of fire *Pamphlets on Forestry in Minnesota*
