**Relevance and Narrative Research** Matei Chihaiia, Katharina Rennhak, 2019-03-28 Relevance is one of the most widely used buzz words in academic and other socio political discourses and institutions today which constantly ask us to be relevant To date there is no profound scholarly conceptualization of the term however which is widely accepted in the humanities Relevance and Narrative Research closes this gap by initiating a discussion which turns the vaguely defined evaluative tool relevance into an object of study The contributors to this volume do so by firmly situating questions of relevance in the context of narrative theory Briefly put they ask either What can relevance do for narrative research or What can narrative research do for better understanding relevance or both The basic assumption is that relevance is a relational term Further assuming that most if not all relations which human beings encounter within their cultures are narratively constructed the contributors to this volume suggest that reflections on narrative and narrative research are fundamental to any endeavor to conceptualize notions of relevance      A Practical Guide to the NEC3 Engineering and Construction Contract Michael
