Rachel S Tattersall

World Development Report 1990:

Human Development Report 1990 United Nations Development Programme, 1990 First in a series of annual reports this volume is about people and about how development enlarges their choices access to income long life knowledge political freedom personal security community participation and guaranteed human rights It measures human development not by the yardstick of income alone but by the human development index reflecting life expectancy literacy and command over resources to enjoy a decent standard of living The report analyzes the record of human development for the last three decades and the experience of 14 countries in managing economic growth and human development The volume concludes with human development indicators for more than 130 countries both developing and developed ISBN 0 19 306481 X pbk 15 95

Population and Development Robert Cassen, 1994-01-01 This volume presents the latest thinking concerning the effect of population growth on economic development and other areas of global concern The authors address the complex issues that currently face both developed and developing country governments in all areas of population growth exploring impacts within their country and internationally World Development Report 1996, 1996 Almost one third of the world's population has embarked on a transition from planned to market economies Like economic reforms elsewhere the long term goal of this transition is to build a thriving market economy capable of delivering long term growth in living standards Now in its 19th annual edition the World Development Report 1996 takes an in depth look at these transition countries focusing on the key lessons that have taken place thus far The introduction to the Report poses a number of key questions that are addressed in later chapters including questions relating to initial challenges and how countries have tackled them from very different starting points and political conditions The Report also focuses on the additional challenges these transition countries face with a final chapter that summarizes the main conclusion of the Report creating a text that will no doubt become the definitive source for students studying international economics and politics

Mega-city Growth and the Future Roland J. Fuchs, 1994 This book examines a range of issues related to the mega city phenomenon Part one deals with the growth of mega cities and explores demographic issues labour force change in the big cities of Asia the effect of macroeconomic forces on the world city system and the relations between technology and the city In part two the discussion focuses on the economic and social consequences of mega city growth Part three looks at the crucial issue of the management of mega cities taking up such issues as infrastructure financing land and shelter needs transportation and environmental management The final chapter examines priority urban management issues in developing countries and derives a research agenda for the 1990s Adapted by the author Human Development Report 1993 United Nations Development Programme, 1993 Since its headline making debut the Human Development Report has become an essential resource for development specialists economists and political scientists around the world While previous Human Development Reports focused on investment in people the 1993 Report not only updates the findings of the earlier volumes

but shifts the focus towards the other side of human development mobilizing and utilizing human potential The Report surveys the instruments for enhancing and encouraging participatory patterns of development including privatization and participatory market structures vertical and horizontal decentralization of government functions devolution of government powers enterprise decentralization involvement of NGOs and other grass roots organizations and empowerment of people It probes the vital connections between employment and development and offers a global framework for employment that takes into account the growing pressure for international migration In addition it examines links between human development and international markets for goods capital and labor and presents updated human development indicators for more than 160 countries

Poverty and Development S. M. Ravi Kanbur, 1990 World Development Report, 1991 This report synthesizes and interprets the lessons of more than forty years of development experience Together with last year's report on poverty and next year's on the environment it seeks to provide a comprehensive overview of the development agenda The 1990s began with dramatic changes as many countries in Eastern Europe and elsewhere initiated ambitious reforms of their economic and political systems Against the backdrop of these transitions this report links the historical debates that counseled policymakers in their past decisions the lessons of experience and the evolving thought on how best to proceed One of the most valuable lessons relates to the interaction between the state and the market in fostering development It describes a market friendly approach in which governments allow markets to function well and in which governments concentrate their interventions on areas in which markets prove inadequate The report looks at four main aspects of the relationship between governments and markets a investing in people b the climate for enterprises to flourish c the integration of countries with the global economy and d a stable macroeconomic foundation for sustained progress The report stresses that above all the future of developing countries is in their own hands Domestic policies and institutions hold the key to successful development

Apostles of Development David C. Engerman, 2025-05-30 The battle against global poverty that began after World War II was a major undertaking engaging economists engineers and organizations Featuring front and centre were six remarkable economists Amartya Sen Manmohan Singh Mahbub ul Haq Jagdish Bhagwati Rehman Sobhan and Lal Jayawardena all born as colonial subjects in the British Empire and studied at Cambridge University They represented a new figure on the world scene the Third World development expert and played a crucial role in global debates about poverty and development Apostles of Development examines their different economic doctrines and the ongoing debate surrounding economic theory in poor countries compared to rich ones The lives of these apostles reveal how development did not begin with textbooks but with real world attempts to solve very specific and pressing problems Finally the book emphasizes that development was a Global South project first and foremost aiming to improve the conditions of the world's poorest countries It challenges the conventional wisdom that sees development only as a tool of rich countries to dominate or as proof of their humanitarian spirit It argues that development succeeds not when it follows ideological prescriptions but

when it looks for what works The fading of grand visions shaped by ideological concerns has been one of the lasting effects of the end of the Cold War The book argues that the best way forward is determined modestly focusing on practical matters such as addressing gross inequality and insisting that development means more than just economic growth Given the salience of questions of economic inequality and the constant visibility of the promises and problems of economic development in the world today this is a timely and important read World Development Report 1990 World Bank,1990 Human Development and Global Institutions Richard Ponzio,Arunabha Ghosh,2016-02-05 This book provides a timely and accessible introduction to the foundational ideas associated with the human development school of thought It examines its conceptual evolution during the post colonial era and discusses how various institutions of the UN system have tried to engage with this issue both in terms of intellectual and technical advance and operationally Showing that human development has had a profound impact on shaping the policy agenda and programming priorities of global institutions it argues that human development has helped to preserve the continued vitality of major multilateral development programs funds and agencies It also details how human development faces new risks and threats caused by political economic social and environmental forces which are highlighted in a series of engaging case studies on trade water energy the environment democracy human rights and peacebuilding The book also makes the case for why human development remains relevant in an increasingly globalized world while asking whether global institutions will be able to sustain political and moral support from their member states and powerful non state actors It argues that fresh new perspectives on human development are now urgently needed to fill critical gaps across borders and entire regions A positive forward looking agenda for the future of global governance would have to engage with new issues such as the Sustainable Development Goals energy transitions resource scarcity and expansion of democratic governance within and between nations Redefining the overall nature and specific characteristics of what constitutes human progress in an increasingly integrated and interdependent world this book serves as a primer for scholars and graduate students of international relations and development It is also relevant to scholars of economics political science history sociology and women s studies *Human Development Report 1995* United Nations Development Programme,1995 This sixth edition of the widely respected Human Development Report updates the unique Human Development Indicators comparing human development in most countries of the world and the data tables on all aspects of human development This edition includes a special section that examines issues of gender analyzing global trends in closing and widening gender gaps in different regions and countries It presents new indicators of gender equality in order to rank countries on a global scale while it highlights policies that have ensured equal access to opportunities for men and women The issue also proposes new methodologies to measure and value unpaid contributions made by men and women to human development through household and community activities and it identifies a new action agenda for promoting gender equality in the decades ahead Human Development Report ,1999 *National Human Development Report* ,1996

World Development Report 2006 World Bank, World Bank Group, 2005-09 Inequality of opportunity both within and among nations sustains extreme deprivation results in wasted human potential and often weakens prospects for overall prosperity and economic growth concludes the 2006 World Development Report To correct this situation and reduce poverty more effectively Equity and Development recommends ensuring more equitable access by the poor to health care education jobs capital and secure land rights among others It also calls for greater equality of access to political freedoms and political power breaking down stereotyping and discrimination and improving access by the poor to justice systems and infrastructure To level the playing field among countries and thereby reduce global inequities that hurt the poor in developing countries the report calls for removal of trade barriers in rich countries flexibility to allow greater migration of lower skilled people from developing countries and increased and more effective development assistance
