## **Smart Teaching Using Brain Research And Data To Continuously Improve Learning:**

**Smart Teaching** Ronald Fitzgerald, 2006 With heightened requirements being placed on the performance of schools educators are under pressure to demonstrate continuous improvement in students Obviously some students are more apt to learn and show improvement than others But the challenge facing educators comes from teaching those that do not readily show improvement and then identifying what is causing their problems Research indicates that the developing brains of youngsters often learn in different ways u struggling students are not necessarily poor learners just unable to process the information as it was presented By understanding the different ways in which studentse brains learn and maintaining carefully recorded data of efforts teachers can effectively teach students in the way most befitting their personal needs which will result in demonstrated improvement and higher test scores Smart Teaching Using Brain Research and Data to Continuously Improve Learning can help any educator grow and expand a system that will make teaching more effective and more fun Of course that system should be pursued on a school wide and district wide basis as well as in individual classrooms That is the positive requirement that is the foundation of the national No Child Left Behind program More important every student and every family has a right to expect such pursuit of quality in every classroom the very simple system components of this book are derived from many resources neuroscience cognitive research projects and observation of practice and results in K 12 and adult classrooms This user friendly guidebook contains many charts and diagrams to effectively convey the information in an easy to use format the result is a tested and successful teaching system presented in a convenient yet powerful guide that will lead educators to bring about improvement *Brain-Friendly Learning* D. Ed. Fitzgerald, 2009-12 The Handbook This compact handbook is a great resource for any high school or middle school student It uses recent brain research to help a teenager learn how to use his or her unique brain most effectively in school and then in college or on a carefully selected career path Summary of Main Points Explained in the Handbook 1 Using brain friendly techniques improves learning 2 LEARNING HOW TO LEARN is an important subject 3 Brain characteristics vary based on left right dominance and upper lower thinking preferences 4 The left brain favors logic words and numbers 5 The right brain favors randomness and images Use drawings in your notes 6 Different styles of receiving information include auditory visual somatic and reflective 7 Use your preferred style for difficult learning but grow your comfort with other styles also 8 Graphic organizers can be useful to most learners 9 The brain tends to remember useful information 10 Using multiple senses usually results in more learning than using one sense 11 Discussion with others can aid learning 12 Using information gives it meaning and helps learning 13 Teaching others helps you to learn more 14 Each of us has multiple types of intelligence or thinking techniques but most of us have intelligence or talent preferences 15 As with learning styles use your preferred intelligences but grow others also to gain the most thinking power 16 Emotional intelligence is especially important to career success 17 A cause and effect diagram can be a powerful thinking and planning tool Use it to grow planning power in your

pre frontal lobes 18 A Brain Preference Test can give you important information on your thinking preferences 19 Matching your thinking preferences to a career area can help you to enjoy your work 20 Be conscious of your best attention span age 2 minutes to a maximum of 30 21 Use the beginning end middle or B E M rule to improve learning efficiency Alternate study with short breaks or changed activity 22 Repetition aids remembering 23 Experience or doing something with what you have learned aids remembering 24 Experiencing emotion with learning promotes remembering 25 Downtime breaks rest or sleep after learning and then review or using the information promotes remembering
