*Software Re-use, Utrecht 1989* Liesbeth M. Dusink, Patrick A.V. Hall, 1991-05-29 This volume contains the papers revised after the workshop had taken place together with the reports of the parallel sessions from the Software Re use Workshop held in Utrecht from 23 24 November 1989 Members of the leading research teams from Europe were invited to the workshop to present short papers The various researchers approaches were debated in the parallel sessions on domain analysis on component engineering including reverse engineering and on the development of software from re usable components Re use of software may be defined as a means to support the construction of new programs using in a systematic way existing designs design fragments program texts documentation or other forms of program representation This excludes porting and maintenance because these activities are based on keeping the same software in a changing hardware or software environment Software re use is sometimes regarded as a solution to the software crisis by both improving software quality and reducing costs and timescales However although the idea is simple there are technical problems to be overcome including standard description of components methods for generic

components use for reverse engineering library organisation for easy retrieval methods for design using components and how to use knowledge of the underlying domains The book starts with an introduction to software re use and has a comprehensive bibliography merged from those accumulated at Delft and Brunel The book provides an excellent state of the art summary of software re use which will be of interest to software engineers and postgraduate students who need a rapid introduction to software re use and its main research issues together with the results of current research from teams across Europe
