World-wide Albert V. Baez,1976 UNESCO pub Monograph on present trends in the educational development of science
education with particular reference to the needs of developing countries examines past experience possible strategies and
promising innovations and covers secondary education activities educational technology teaching methods the role of the
teacher etc Annotated bibliography pp 237 to 249 Resources in Education ,1989-03 *Socio-Cultural Perspectives on*
Science Education W.W. Cobern,2012-12-06 Global science education is a reality at the end of the 20th century albeit an
uneven reality because of tremendous technological and economic pressures Unfortunately this reality is rarely examined in
the light of what interests the everyday lives of ordinary people rather than the lives of political and economic elites The
purpose of this book is to offer insightful and thought provoking commentary on both realities The tacit question throughout
the book is Whose interests are being served by current science education practices and policies The various chapters offer
critical analysis from the perspectives of culture economics epistemology equity gender language and religion in an effort to
promote a reflective science education that takes place within rather than taking over the important cultural lives of people
The target audience for the book includes graduate students in education science education and education policy professors
