

# Wellhead Protection Protects Drinking Water

The Minnesota Department of Health (MDH) works with public water systems and communities to carry out wellhead protection. Wellhead protection seeks to prevent contaminants from entering the wells and groundwater that supply drinking water.

MDH staff work with local wellhead protection teams to create a Wellhead Protection Plan. There are several steps to this process:

**Delineation**

**Vulnerability assessment**

**Contaminant source inventory**

**Management strategies**

**Contingency plan**

**Plan implementation**
