justification of object induction Taken together these two results provide a noncircular solution to Hume s problem Schurz discusses the philosophical debate on the problem of induction addressing all major attempts at a solution to Hume s problem and describing their shortcomings presents a series of theorems accompanied by a description of computer simulations illustrating the content of these theorems with proofs presented in a mathematical appendix and defends refines and applies core insights regarding the optimality of meta induction explaining applications in neighboring disciplines including forecasting sciences cognitive science social epistemology and generalized evolution theory Finally Schurz generalizes the method of optimality based justification to a new strategy of justification in epistemology arguing that optimality justifications can avoid the problems of justificatory circularity and regress [NASA Tech Brief](#) United States.
