Cissna, 2013-11-05 The future of the field of communication lies in the ability to produce a socially relevant scholarship without which the field is unlikely to attract the best students command significant societal resources or make its greatest contributions to the world s store of knowledge This volume presents a report of the first discipline wide nationally sponsored communication research conference in 20 years the Tampa Conference on Applied Communication As the next millennium approaches the communication field will be challenged to take its place among the disciplines whose research makes a substantial contribution to the well being of society How the communication field should respond to that challenge was the focus of the conference and this volume Crossing all disciplinary boundaries Applied Communication in the 21st Century addresses issues of concern to all scholars in the

Thompson,2022-11-15 There are particular challenges involved in teaching social work As with other professional disciplines it is not simply a matter of passing on the key elements of the knowledge base there is also the need to equip students to be able to make use of that knowledge in practice and in the context of relevant professional values Neil Thompson is a distinguished international scholar and brings over 30 years of experience to a wide range of case studies and transferable skills that will provide a foundation for future social workers everywhere *Storied Health and Illness* Jill Yamasaki,Patricia

Geist-Martin,Barbara F. Sharf,2016-07-01 Health and illness are storied experiences that necessarily entail personal cultural and political complexities For all of us communicating about health and illness requires a continuous negotiation of these complexities and a delicate balance between what we learn about the biology of disease from providers and our own very personal subjective experiences of being ill *Storied Health and Illness* brings together dozens of noteworthy scholars both established and emerging in a provocative collection that embraces narrative ways of knowing to think about analyze and reconsider our own and others health beliefs behaviors and communication Comprehensive content reflects the editors substantial research in integrative health narrative care and innovative ways of improving well being and quality of life in personal relationships healthcare the workplace and community settings Unique narrative approaches to the study of health communication include 14 chapters written by 22 contributors who use engaging stories from their own research or personal experience to introduce and ground foundational communication concepts in healthcare health promotion community support organizational wellness and other health related sites of interest Compelling stories of individuals living with the inherent challenges and unexpected opportunities of mental illness addiction aging cancer dialysis sexual harassment miscarriage obesity alopecia breastfeeding health threats to immigrant workers developmental differences and youth gun

Disturbing Practice Avner Segall,2002 Annotation Segall teacher education Michigan State U presents this critical analysis of teacher education based on a year long study of six social studies teacher trainees at the University of Western Canada The author raises questions about what and how teacher trainees learn do not learn and learn not to learn in preservice education courses how the structures discourses and practices in these courses encourage students to learn some things and not others and how typical teacher trainee courses influence the classroom choices later made by graduates when they become teachers Segall argues that traditional teacher training courses encourage compliance over true critical thinking making it difficult to produce critical teachers who provide critical education in our schools Annotation c Book News Inc Portland OR booknews com *Actes Society of Dance History Scholars (U.S.).
