Stochastic Programming Methods And Technical Applications:

   Stochastic Programming Methods and Technical Applications Kurt Marti,Peter Kall,2012-05-29 Optimization problems arising in practice usually contain several random parameters Hence in order to obtain optimal solutions being robust with respect to random parameter variations the mostly available statistical information about the random parameters should be considered already at the planning phase The original problem with random parameters must be replaced by an appropriate deterministic substitute problem and efficient numerical solution or approximation techniques have to be developed for those problems This proceedings volume contains a selection of papers on modelling techniques approximation methods numerical solution procedures for stochastic optimization problems and applications to the reliability based optimization of concrete technical or economic systems   **Stochastic Optimization** Kurt Marti,2012-12-06 This volume includes a selection of refereed papers presented at the GAMM IFIP Workshop on Stochastic Optimization Numerical Methods and Technical Applications held at the Federal Armed Forces University Munich May 29 31 1990 The objective of this meeting was to bring together scientists from Stochastic Programming and from those Engineering areas where Mathematical Programming models are common tools as e g Optimal Structural Design Power Dispatch Acid Rain Management etc The first theoretical part includes the papers by S D Flam H Niederreiter E Poechinger and R Schultz The second part on methods and applications contains the articles by N Baba N Grwe and W Roemisch J Mayer E A Mc Bean and A Vasarhelyi   **Physical Processes in Astrophysics** Ian W. Roxburgh,Jean-Louis Masnou,1995-09-18 This volume in honour of Evry Schatzman contains in depth reviews on central topics of modern astrophysics such as stellar physics covering stellar evolution solar neutrinos stellar rotation and spin down convection transport processes neutron stars white dwarfs and novae All the talks were given by leading experts who had time both to develop the basics of their subject and to cover recent work The volume is meant for both graduate students and researchers   **Stochastic Programming** Kurt Marti,Peter Kall,1995-04-06 Proceedings of the 2nd GAMM IFIP Workshop on Stochastic Optimization Numerical Methods and Technical Applications held at the Federal Armed Forces University Munich Neubiberg M nchen Germany June 15 17 1993   **Stochastic Programming Methods and Technical Applications** Kurt Marti,Peter Kall,1998-03-18 Optimization problems arising in practice usually contain several random parameters Hence in order to obtain optimal solutions being robust with respect to random parameter variations the mostly available statistical information about the random parameters should be considered already at the planning phase The original problem with random parameters must be replaced by an appropriate deterministic substitute problem and efficient numerical solution or approximation techniques have to be developed for those problems This proceedings volume contains a selection of papers on modelling techniques approximation methods numerical solution procedures for stochastic optimization problems and applications to the reliability based optimization of concrete technical or economic systems   Stochastic Programming Kurt Marti,Peter Kall,2013-12-14 In order to obtain more reliable

optimal solutions of concrete technical economic problems e g optimal design problems the often known stochastic variations of many technical economic parameters have to be taken into account already in the planning phase Hence ordinary mathematical programs have to be replaced by appropriate stochastic programs New theoretical insight into several branches of reliability oriented optimization of stochastic systems new computational approaches and technical economic applications of stochastic programming methods can be found in this volume   <u>Decision Making Under Uncertainty</u> Claude Greengard,Andrzej Ruszczynski,2012-12-06 In the ideal world major decisions would be made based on complete and reliable information available to the decision maker We live in a world of uncertainties and decisions must be made from information which may be incomplete and may contain uncertainty The key mathematical question addressed in this volume is how to make decision in the presence of quantifiable uncertainty The volume contains articles on model problems of decision making process in the energy and power industry when the available information is noisy and or incomplete The major tools used in studying these problems are mathematical modeling and optimization techniques especially stochastic optimization These articles are meant to provide an insight into this rapidly developing field which lies in the intersection of applied statistics probability operations research and economic theory It is hoped that the present volume will provide entry to newcomers into the field and stimulation for further research   **Handbook of Asset and Liability Management** Stavros A. Zenios,William T. Ziemba,2006-07-17 This first volume of the Handbook of Asset and Liability Management presents the theories and methods supporting models that align a firm s operations and tactics with its uncertain environment Detailing the symbiosis between optimization tools and financial decision making its original articles cover term and volatility structures interest rates risk return analysis dynamic asset allocation strategies in discrete and continuous time the use of stochastic programming models bond portfolio management and the Kelly capital growth theory and practice They effectively set the scene for Volume Two by showing how the management of risky assets and uncertain liabilities within an integrated coherent framework remains the core problem for both financial institutions and other business enterprises as well Each volume presents an accurate survey of a sub field of finance Fills a substantial gap in this field Broad in scope   *Operations Research Proceedings 2003* Dino Ahr,Roland Fahrion,Marcus Oswald,Gerhard Reinelt,2012-12-06 This volume contains a selection of papers referring to lectures presented at the symposium Operations Research 2003 OR03 held at the Ruprecht Karls Universitiit Heidelberg September 3 5 2003 This international con ference took place under the auspices of the German Operations Research So ciety GOR and of Dr Erwin Teufel prime minister of Baden Wurttemberg The symposium had about 500 participants from countries all over the world It attracted academians and practitioners working in various field of Opera tions Research and provided them with the most recent advances in Opera tions Research and related areas in Economics Mathematics and Computer Science The program consisted of 4 plenary and 13 semi plenary talks and more than 300 contributed papers selected by the program committee to be presented in 17 sections Due to a limited number of pages
