U.S. Master Depreciation Guide (2008) CCH Tax Law Editors,2007-12 CCH s U S Master Depreciation Guide offers tax and accounting professionals who work with businesses a one stop resource for guidance in understanding and applying the complex depreciation rules to their fixed assets This area is especially challenging because bits and pieces of applicable information must be gathered from a maze of Revenue Procedures IRS Tables and IRS Regulations These sources are frequently old and include some materials which may be non applicable CCH s U S Master Depreciation Guide pulls the

pieces together so practitioners can make sense of all the corresponding information and put the information into practice

Ageing Labour Forces Philip Taylor, 2008-01-01 Philip Taylor has produced an important and excellent edited collection on a topic of immediate and ongoing relevance. The case studies presented in this collection are highly accessible and rich in detail and provide comprehensive and interesting analyses of ageing labour forces. The book challenges myths and oft accepted statements made by policy makers and other commentators about population ageing, older workers' position in the labour market and in workplaces and social supports for this segment of the labour force. In addition, the volume demonstrates the strength of the case study methodology in helping us to better understand social structures and relations. Of particular value is that the contributions are from researchers from varied disciplines across advanced industrialized countries; this collection is highly valuable for policy makers, employers, unionists and academics and should not be ignored.

Vivian Shalla *Labour LeTravail* This book makes an important contribution to the policy debate about age and the workforce and will be valuable both to academic researchers interested in the labour market and ageing policy and to policymakers who wish to understand the diversity of national approaches to a shared agenda. This book sheds new light on the differences between countries' approaches to the common policy issues and highlights some of the issues which policy needs to address. Taylor's overarching argument that we should be cautious about making over-optimistic assumptions about the benefits of extending working life is timely.

Stephen McNair *Ageing and Society* The book is extremely valuable for policy makers, labour market and welfare pensions experts and the social partners because it contains a comprehensive analysis of the legal, institutional, welfare and employment policy developments over the past few decades in the eight countries. It offers policy guidance and examples of good practices for dealing with an ageing workforce but also showing the adverse effects of well intentioned policies and legislation.

Hedva Sarfati *Relations Industrielles: Industrial Relations Ageing Labour Forces* is a provocative work which will appeal to academics and researchers interested in work ageing and public policy as well as labour economics.

SirReadaLot.org This provocative book considers the changing status of older workers, the evolution of public policy on age and work and the behaviour of employers. It attempts to answer the critical question: in an ageing society, can older workers look forward to the prospect of longer working lives with choice and security and make successful transitions to retirement? *Ageing Labour Forces* challenges the current stance of many governments and observers concerning policies to extend working lives. It utilises perspectives and case studies from public policy, employment policy and the attitudes and behaviour of older people. Philip Taylor argues that older workers have been at the forefront of industrialized society's efforts to respond to the crisis facing social welfare systems and the economic threats associated with population ageing. Their involvement has forced the restructuring of economies, adjustments to social welfare systems as well as redefinitions to the actual concept of old age. Containing contributions from leading researchers in a number of countries, this work will appeal to academics and researchers interested in work ageing and public policy as well as labour economics.
