English,Joanne T. Mulligan,2013-05-09 This book emanated primarily from concerns that the mathematical capabilities of young children continue to receive inadequate attention in both the research and instructional arenas Research over many years has revealed that young children have sophisticated mathematical minds and a natural eagerness to engage in a range of mathematical activities As the chapters in this book attest current research is showing that young children are developing complex mathematical knowledge and abstract reasoning a good deal earlier than previously thought A range of studies in prior to school and early school settings indicate that young learners do possess cognitive capacities which with appropriately designed and implemented learning experiences can enable forms of reasoning not typically seen in the early years Although there is a large and coherent body of research on individual content domains such as counting and arithmetic there have been remarkably few studies that have attempted to describe characteristics of structural development in young students mathematics Collectively the chapters highlight the importance of providing more exciting relevant and

challenging 21st century mathematics learning for our young students The chapters provide a broad scope in their topics and approaches to advancing young children s mathematical learning They incorporate studies that highlight the importance of pattern and structure across the curriculum studies that target particular content such as statistics early algebra and beginning number and studies that consider how technology and other tools can facilitate early mathematical development Reconceptualising the professional learning of teachers in promoting young children s mathematics including a consideration of the role of play is also addressed

**Math & Science for Young Children** Rosalind Charlesworth,Karen Lind,2007 Math and Science for Young Children 5e is a unique reference that focuses on the integration of math and science with the other important areas of child development during the crucial birth through eight age range It also carefully addresses the ever changing and significant national standards of the following organizations The National Association for the Education of Young Children NAEYC National Council of Teachers of Math NCTM National Science Teachers Association NSTA American Association for the Advancement of Science AAAS and the National Research Council NRC A valuable resource for the student learner working professional as well as the involved parent Math and Science for Young Children 5e is the most current volume of information of its kind available on the market today
