Teachers Science Companion:

A Teacher's Science Companion Phyllis J. Perry, 1994 This is a bibliography organized by topic of more than 2000 children's science and math books, videos, magazines, and kits. In addition, step-by-step activities accompany the extensive listing, providing instant lessons on the subject. **Kindergarten Teacher Activity Manual**, 2005 Asking why is as natural to children as playing. Science Companion recognizes that children are scientists by nature and builds on their inborn curiosity and enthusiasm with hands-on experiences. Correlating with national standards for science literacy, Science Companion also gives teachers the quality resources they need for confident and creative implementation. Teachers in each grade will find explorations in the life, physical, and earth sciences, always geared toward dynamic student participation.

Science Companion, 2005 This inquiry-based modular science curriculum covers three strands: life science, physical science, and earth science. The pre-kindergarten/ kindergarten level contains five modules, and levels 1-5 contain three modules each. The Teacher Lesson Manuals for levels 1-5 are accompanied by Teacher Masters books for each module. The set is accompanied by three mini-modules for physical science, 2 modules for levels 1-3, and 1 module for levels 3-5, which consist of Teacher Lesson Manuals and Teacher Masters visual packs.
