Vernon Fisher is no stranger to New York, but he has lived and worked in Texas nearly all his life. For an artist aged 42 to work at a level competitive enough to be consistently acknowledged in New York while still continuing to live in Fort Worth, Texas, requires a day-by-day decision. To be taken seriously in New York, let alone in Europe, your work has to be part of the dialogue there, but to make art that too easily slips in contradicts the very reason for staying in individual Texas. Defying the tendency to mimic New York styles, Fisher has found a way to belong to the dialogue without being enslaved by it.

The pace, style of life, and attitudes here in Texas are so different from what they are in New York, Fisher's work reflects the schizophrenic dualities of sophistication and hermeticism, of competition and isolation, and of being in and out of step at the same time. My interest in Fisher's work began when I moved to Texas six years ago, although at that time his narrative paintings were only occasionally being shown outside the state; he was already firmly entrenched as a major figure here, doing well, but not well enough to evade the trap often sprung on regional artists when the critical perspective on their work is dependent on New York, and especially on New York's romance with their outsider/insider status. Fisher, in fact, fell victim to this syndrome for years; he emerged from national oblivion only when New York critics and curators began to validate his career. (He is still practically unknown in Europe.) Artists here are caught between two equally unproductive biases: on the one hand they may be supported simply because they are Texas, while on the other they may be ignored for just the same reason. Both boosterism and occasional tokenism miss the point of whatever rigor and authenticity is in the work itself.

Having received recognition, Fisher now faces a different challenge: that of not becoming a virtual denizen in a place where he is considered to have "made it." What is lacking here in Texas (and even Texas is better than most of the rest of the country in this regard) is the productive dialogue that criticism can generate. Negative as well as supportive criticism can give an artist the extra energy that he or she needs. It can prevent the overworking of ideas and provide an atmosphere of risk-taking, even if it's to defy the critics. Fisher's best work, not surprisingly, has been made when he has been receiving regular feedback. Isolation, contrary to romantic illusion, is generative only up to a point, beyond which it becomes tragic. It's a question of balance. Fisher's work, for example, broke out of a dull conceptual phase in the mid '70s, a period when he seemed to be tailoring his work for New York, into the narrative work of the late '70s only when he reevaluated his goals after being passed over for a Whitney Biennial. He should not, however, be accused of playing to the critics, particularly as the changes he made at that time, and subsequently were unexpected, and did not earn him any immediate rewards.

In the past six years the scale, purpose, and energy of Fisher's work has changed considerably. It
