presents the definitive history of the largest civil jet transport to be designed built and enter service in the UK It also covers all variants such as the V1000 VC11 and VC10 Superb and includes a close up detail section for modellers **VC10: Icon of the Skies** Lance Cole,2017-03-30 An excellent account of the political battles and the commercial skulduggery and its outstanding service as a transport and tanker with the RAF Firetrench The VC10 was the nation s biggest jet airliner of its age and regarded as the world s best looking airliner It was safe fast and designed to take off from short runways in Africa and Asia at the request of its main operator BOAC the airline that would later go on to become today s British Airways The VC10 and the larger Super VC10 were beloved by pilots and passengers alike and became icons of the 1960s They were hugely popular all over the world Yet the VC10 was eclipsed by Boeing s 707 which sold by the hundreds despite the fact that the 707 was less capable and could not initially operate from the runways of the Commonwealth and old British Empire routes as the VC10 undoubtedly could This book blends the story of VC10 development with a well researched tale of corporate and political power play It asks just what lay behind the sales failure of the VC10 Politics played an important part of course as did BOACs tactics and a whodunnit cast of politico corporate events and machinations at the highest level of society during the dying days of Empire in 1960s Britain Key players in the story from Tony Benn to famous test pilot Brian Trubshaw Concorde are cited and quoted By exploring this historical period in depth and highlighting all the various impediments that stood in the way of success for the VC10 Lance Cole adds an important layer to our understanding of twentieth century history *A History of Aviation at Brooklands in 100 Objects* Nigel Spooner,2024-07-30 At the dawn of the twentieth century mankind had not yet achieved powered flight The main motive power then was provided by steam engines heavy dirty and inefficient If one wanted to travel over seas one had to travel on them A journey from London to New York by steam driven train and ship took more than 6 days By the time the same century drew to a close in December 1999 air travel was the normal choice for long journeys Millions of people every day flew comfortably and safely in pressurised aluminium airliners propelled by simple clean and efficient gas turbine engines The same journey from London to New York could be achieved at supersonic speed in less than 6 hours For much of that century many of the extraordinary developments that moved aviation from fragile wood and fabric biplanes to supersonic transports were achieved on 330 acres of low lying former estate farmland in Surrey England The estate was called Brooklands Those marshy acres were transformed from 1907 into the world s first custom built motor racing circuit then a rapidly developing aerodrome and finally one of the country s largest aircraft factories employing tens of thousands of people Nearly 19 000 aircraft of many different types were built at Brooklands during nine decades of peace and war By the 1980s however it was being eclipsed by larger manufacturing sites elsewhere with longer runways and better communications links its owner by then called British Aerospace finally closed the factory in 1989 This book tells the history of those amazing developments through 100 of the key aircraft engines places and other objects that can still be seen either in or near Brooklands Museum or in other locations around the country It also

highlights the stories of six designers whose inspiring creativity produced aircraft engines and weapons ranging from Camel to Concorde Fury to Harrier Wellington to Viscount Merlin to Olympus Between them Thomas Sopwith Barnes Wallis Rex Pierson Sydney Camm Stanley Hooker and George Edwards were responsible for much of what was designed built and flown not only at Brooklands but elsewhere too The book is arranged in successive historical episodes but the many links between the objects and the designers should allow readers to follow different paths if they so wish It is not intended as a technical reference but rather to inspire the reader to seek out the objects and discover more about them [De Havilland DH.106 Comet](#) Wolfgang Borgmann,2024-04-28 This book is the perfect addition to the A Legends of Flight Illustrated History series As the first jetliner operated in scheduled service the de Havilland Comet is a very important aircraft type in airline history It set the standards for modern air transport and is therefore a MUST for this book series **British Aircraft Corporation** Stephen Skinner,2012-08-01 The British Aircraft Corporation was formed from The Bristol Aeroplane Company English Electric Vickers Armstrong and Hunting in 1960 In its short seventeen year life the British Aircraft Corporation built some of the most important aircraft and missiles of the 1960s 1970s and beyond its best known products included the Jaguar and Tornado warplanes Rapier missile and One Eleven airliner It was also responsible for the stillborn TSR2 strike aircraft the 1965 cancellation of which remains controversial to this day Most famously the Anglo French Concorde supersonic airliner came from the BAC stable BAC was subsumed into British Aerospace now BAE Systems in 1977 but many of its products remain in service to this day This book tells their complete story **Air University Library Index to Military Periodicals** ,1962 **Accelerating Sustainable Aviation Initiatives** Luiz Manuel Braga da Costa Campos,2025-02-13 Accelerating Sustainable Aviation Initiatives Markets Economics and Social Issues examines the twin challenges of clean aviation and the industry s ongoing recovery from the COVID 19 crisis The book looks at integrated technologies and societal issues driving aircraft design certification operational performance maintenance and safety Coverage includes emerging technologies for low emissions and the evolution of aircraft fleets toward zero environmental impact the effects of COVID 19 and economic efficiency and market implications of renewing current fleets to meet environmental targets The book will be of keen interest to professionals and researchers interested in emerging technologies for clean aviation and the industry s emergence from the COVID 19 crisis **Vc10** Stephen Skinner,2022-12-30 One of the truly iconic jet airliners the Vickers VC10 is superb example of British engineering that left a lasting impression on many those who flew it as pilots or in it as crew or passengers those who worked on the initial design manufacturing or maintenance programs or those many more who simply saw it in the skies After 51 years in the air the VC10s are now retired but readers can relive its heyday in Key Publishing s new 116 page special perfect bound tribute to the type VC10 magazine looks at the type s development its service with the RAF including the Gulf War and operations over Iraq plus data files and production lists This 116 page special publication pays tribute to this legend of the skies [Air University Periodical Index](#) ,1961 **Air Pictorial** ,2002
