From local and global contexts, it delves into research-based learning activities for science teacher educators, offering insights to educators worldwide. The book aims to empower teachers to provide students with learning experiences centered on local socioscientific issues, essential for developing scientifically literate citizens. Each chapter showcases effective practices focusing on local topics like gold mining, nuclear power plants, and river pollution. By incorporating socioscientific elements into science lessons, teachers are encouraged to foster students' responsibility, values, argumentation, critical thinking, and awareness. Emphasizing the crucial components of place-basedness and relevancy of SSI learning environments, students are guided towards more sophisticated ways of conceptualizing and resolving SSI. The intended audience includes science teacher educators, researchers, and educators devoted to engaging students in meaningful socioscientific learning experiences.

Higher Education in the Twenty-First Century Abdulla Y. Al-Hawaj, Wajeeh Elali, E.H. Twizell, 2008-08-04. The skills, creativity, and research developed through higher education are major factors in any society's success in creating jobs and advancing prosperity. Universities and colleges play a vital role in expanding opportunity and promoting social justice. The papers in this book reflect the main objective of a conference held in June 2007 at Ahlia.

*Sola Scriptura in Asia* Yongbom Lee, Andrew R. Talbert, 2018-11-09. The echo of Luther's hammer resounds in Asia five hundred years after the Wittenberg controversy; the cross is a flashpoint in China; Korea seeks ecclesiastical reform; the mystical union thrives in Laos; even Kant whispers in old Batavia. The diversity of ideas and influences of the Reformation is as broad and fascinating as the continent resisting reduction to the postcolonial movement and demonstrating an affinity with Protestant foundations that somehow remains uniquely Asian. This volume brings together the reflections of Christian academics from the continent to offer a sample of the theological work that remains largely inaccessible to the broader scholarly community, with contributions in the fields of theology, biblical studies, philosophy, and Christian higher education. If the quincentennial of the Reformation has revealed anything, it is the inauguration of Asia as the locus of biblical and theological scholarship for the next five hundred years.

**The Last Christian Generation** Josh McDowell, David H. Bellis, 2006 The research on the current generation of young people reveals an alarming fact they have redefined what it means to be Christian The majority of our church-ed young people do not believe Christ is the Son of God do not believe the Holy Spirit is a real entity and think doing good earns them a place in heaven And just as disturbing is the fact that their attitudes and behavior are virtually no different than those of non-Christians In this defining message of his 40 years of ministry Josh McDowell strikes at the heart of the problem and offers a clear solution We must bring this new generation face to face with who Christ really is Josh explains They know the facts but they don't know Him They are believing distorted views of Christianity This means we must first model Christlikeness to them and then continually lead them through a basic spiritual formation process that sets them on a solid foundation for building a life that is authentically Christian Reintroduce

the real and relevant Christ to your young people lead them through the process of Christlikeness and you may very well ignite a spiritual revolution for an entire generation     *Annual Catalogue of the Officers and Students of the McCormick Theological Seminary of the Presbyterian Church, Chicago* McCormick Theological Seminary of the Presbyterian Church,1930     **The Christian College** William C.
