and flow of ancient empires the French Revolution and the rise of fascism in Europe in the 19th century These are some of the claims made for volcanic cataclysm Volcanologist Clive Oppenheimer explores rich geological historical archaeological and palaeoenvironmental records such as ice cores and tree rings to tell the stories behind some of the greatest volcanic

events of the past quarter of a billion years He shows how a forensic approach to volcanology reveals the richness and

complexity behind cause and effect and argues that important lessons for future catastrophe risk management can be drawn from understanding events that took place even at the dawn of human origins
