Stochastic Programming Problems With Probability And Quantile Functions:

Stochastic Programming Problems with Probability and Quantile Functions Andreï Ivanovich Kibzun, Yuri S. Kan, 1996-08-06 The concept of a system as an entity in its own right has emerged with increasing force in the past few decades in for example the areas of electrical and control engineering economics ecology urban structures automaton theory operational research and industry The more definite concept of a large scale system is implicit in these applications but is particularly evident in fields such as the study of communication networks computer networks and neural networks The Wiley Interscience Series in Systems and Optimization has been established to serve the needs of researchers in these rapidly developing fields It is intended for works concerned with developments in quantitative systems theory applications of such theory in areas of interest or associated methodology Of related interest Stochastic Programming Peter Kall University of Zurich Switzerland and Stein W Wallace University of Trondheim Norway Stochastic Programming is the first textbook to provide a thorough and self contained introduction to the subject Carefully written to cover all necessary background material from both linear and non linear programming as well as probability theory the book draws together the methods and techniques previously described in disparate sources After introducing the terms and modelling issues when randomness is introduced in a deterministic mathematical programming model the authors cover decision trees and dynamic programming recourse problems probabilistic constraints preprocessing and network problems Exercises are provided at the end of each chapter Throughout the emphasis is on the appropriate use of the techniques rather than on the underlying mathematical proofs and theories making the book ideal for researchers and students in mathematical programming and operations research who wish to develop their skills in stochastic programming *Stochastic Linear Programming* Peter Kall, János Mayer, 2005 CONTENIDO Basic Linear Programming Prerequisites Nonlinear Programming Prerequisites Single Stage SLP models Models involving probability functions Quantile functions Value at Risk Models based on expectation Models built with deviation measures Modeling risk and opportunity Risk measures Multi stage SLP models The general SLP with recourse The two stage SLP The multi stage SLP Algorithms Single stage models with separate probability functions Single stage models with joint probability functions Single stage models based on expectation Single stage models involving VaR Single stage models with deviation measures Two stage recourse models Multistage recourse models Modeling systems for SLP *Mathematical Optimization Theory and Operations Research* Michael Khachay, Yury Kochetov, Panos Pardalos, 2019-06-12 This book constitutes the proceedings of the 18th International Conference on Mathematical Optimization Theory and Operations Research MOTOR 2019 held in Ekaterinburg Russia in July 2019 The 48 full papers presented in this volume were carefully reviewed and selected from 170 submissions MOTOR 2019 is a successor of the well known International and All Russian conference series which were organized in Ural Siberia and the Far East for a long time The selected papers are organized in the following topical sections mathematical programming bi level optimization integer

High Performance Algorithms and Software in Nonlinear Optimization Renato de Leone, Almerico Murli, Panos M. Pardalos, Gerardo Toraldo, 2013-12-01 This book contains a selection of papers presented at the conference on High Performance Software for Nonlinear Optimization HPSN097 which was held in Ischia Italy in June 1997 The rapid progress of computer technologies including new parallel architectures has stimulated a large amount of research devoted to building software environments and defining algorithms able to fully exploit this new computational power In some sense numerical analysis has to conform itself to the new tools The impact of parallel computing in nonlinear optimization which had a slow start at the beginning seems now to increase at a fast rate and it is reasonable to expect an even greater acceleration in the future As with the first HPSNO conference the goal of the HPSN097 conference was to supply a broad overview of the more recent developments and trends in nonlinear optimization emphasizing the algorithmic and high performance software aspects Bringing together new computational methodologies with theoretical advances and new computer technologies is an exciting challenge that involves all scientists willing to develop high performance numerical software This book contains several important contributions from different and complementary standpoints Obviously the articles in the book do not cover all the areas of the conference topic or all the most recent developments because of the large number of new theoretical and computational ideas of the last few years

Discrete Optimization and Operations Research Yury Kochetov, Michael Khachay, Vladimir Beresnev, Evgeni Nurminski, Panos Pardalos, 2016-09-09 This book constitutes the proceedings of the 9th International Conference on Discrete Optimization and Operations Research DOOR 2016 held in Vladivostok Russia in September 2016 The 39 full papers presented in this volume were carefully reviewed and selected from 181 submissions They were organized in topical sections named discrete optimization scheduling problems facility location mathematical programming mathematical economics and games applications of operational research and short communications

Encyclopedia of Optimization Christodoulos A. Floudas, Panos M. Pardalos, 2008-09-04 The goal of the Encyclopedia of Optimization is to introduce the reader to a complete set of topics that show the spectrum of research the richness of ideas and the breadth of applications that has come from this field The second edition builds on the success of the former edition with more than 150 completely new entries designed to

ensure that the reference addresses recent areas where optimization theories and techniques have advanced Particularly heavy attention resulted in health science and transportation with entries such as Algorithms for Genomics Optimization and Radiotherapy Treatment Design and Crew Scheduling *Stochastic Programming* Roger J.-B. Stochastic Programming Methods and Technical Applications Kurt Marti,Peter Kall,1998-03-18 Optimization problems arising in practice usually contain several random parameters Hence in order to obtain optimal solutions being robust with respect to random parameter variations the mostly available statistical information about the random parameters should be considered already at the planning phase The original problem with random parameters must be replaced by an appropriate deterministic substitute problem and efficient numerical solution or approximation techniques have to be developed for those problems This proceedings volume contains a selection of papers on modelling techniques approximation methods numerical solution procedures for stochastic optimization problems and applications to the reliability based optimization of concrete technical or economic systems *Journal of the American Statistical Association* ,2006 A scientific and educational journal not only for professional statisticians but also for economists business executives research directors government officials university professors and others who are seriously interested in the application of statistical methods to practical problems in the development of more useful methods and in the improvement of basic statistical data

Stochastic Optimization Techniques Kurt Marti,2002 Optimization problems arising in practice mostly contain several random parameters Hence in order to get robust optimal solutions with respect to random parameter variations the available statistical information about the random data should be considered already at the planning phase Thus the original problem with random coefficients must be replaced by an appropriate deterministic substitute problem This proceedings volume of the 4th GAMM IFIP Workshop on Stochastic Optimization Numerical Methods and Technical Applications held June 27 29 2000 at the Federal Armed Forces University Munich Neubiberg Munich contains new methods for the approximation and numerical solution of deterministic substitute problems especially the handling of mean value and probability functions as objective and or constraint functions Moreover many concrete applications from engineering and operations research can be found in this book **Algorithms for Nonlinear Programming and Multiple-Objective Decisions** Ber?

Rustem,1998-04-15 Algorithms are solution methods used for optimal decision making in mathematics and operations research This book is a study of algorithms for decision making with multiple objectives It is a distillation of recent research in developing methodologies for solving optimal decision problems in economics and engineering and reflects current research in these areas **Portfolio Optimization and Performance Analysis** Jean-Luc Prigent,2007-05-07 Covering both static and dynamic portfolio optimisation this title contains an overview of active and passive portfolio optimisation With modern risk analysis it summarises results of portfolio optimisation and shows how theoretical results can be applied to practical and operational portfolio management and optimisation **Soviet Journal of Computer and Systems Sciences**
