Vertical Intercourse:

Vertical Intercourse Paul Reed,2000 **The Contextual Challenges of Occupational Sex Segregation** Stephanie Steinmetz,2011-12-15 This study untangles the complex interplay of individual and contextual factors shaping cross national differences in horizontal and vertical occupational sex segregation It relates the individual factors affecting occupational decisions to the broader social and economic context within a given society Following this approach Stephanie Steinmetz provides a comprehensive overview of the development and causes of cross national differences in occupational sex segregation She offers insights into the positioning of 21 EU Members States particularly of former CCE countries Based on advanced multi level models the study shows that institutional factors such as the organization of educational systems post industrial developments social policies and the national gender culture play a crucial role in shaping sex segregation processes apart from individual factors The author clarifies that a distinct set of institutional factors is relevant to each of the two dimensions of occupational sex segregation and that these factors operate in different directions some reduce horizontal segregation while at the same time aggravating the vertical aspect Finally the study assesses the empirical findings from a political perspective by addressing the future contextual challenges of EU Member States seeking to attain higher gender equality on the labour market

Too Few Women at the Top Kumiko Nemoto,2016-08-03 The number of women in positions of power and authority in Japanese companies has remained small despite the increase in the number of educated women and the passage of legislation on gender equality In Too Few Women at the Top Kumiko Nemoto draws on theoretical insights regarding Japan s coordinated capitalism and institutional stasis to challenge claims that the surge in women s education and employment will logically lead to the decline of gender inequality and eventually improve women s status in the Japanese workplace Nemoto s interviews with diverse groups of workers at three Japanese financial companies and two cosmetics companies in Tokyo reveal the persistence of vertical sex segregation as a cost saving measure by Japanese companies Women s advancement is impeded by customs including seniority pay and promotion track based hiring of women long working hours and the absence of women leaders Nemoto contends that an improvement in gender equality in the corporate system will require that Japan fundamentally depart from its postwar methods of business management Only when the static labor market is revitalized through adoption of new systems of cost savings employee hiring and rewards will Japanese women advance in their chosen professions Comparison with the situation in the United States makes the author s analysis of the Japanese case relevant for understanding the dynamics of the glass ceiling in U S workplaces as well

University of Mannheim Fakultät für Sozialwissenschaften Lehrstuhl für Mikrosoziologie und Sozialpsychologie 160 entries in the bibliography language English abstract A series of studies investigates the impact of regulatory fit on women's leadership aspirations A regulatory fit occurs when an outcome is presented in gain frames under a promotion focus and in loss frames under a prevention focus Combining research on regulatory focus and research on stereotype threat it is argued that regulatory fit may result from stereotype threat loss frame under a prevention focus and from the absence of stereotype threat gain frame under a promotion focus In line with previous research it is proposed that regulatory fit a enhances motivation Studies 1 and 2 and b creates a feeling right experience that increases the persuasiveness of external stimuli Study 3 In all three experiments regulatory fit was operationalized as experiencing stereotype threat when under a prevention focus or respectively experiencing the absence of stereotype threat when under a promotion focus Further women's aspirations to engage in a leadership role were assessed In Studies 1 and 2 it was shown that women's motivation to occupy a leadership role was enhanced in the regulatory fit conditions compared to women in the nonfit conditions Study 3 demonstrated that a stimulus i e role model was more persuasive under regulatory fit Women experiencing regulatory fit compared to women in the nonfit conditions were more persuaded by role models showing more interest in a leadership role when confronted with a positive model and less interest when confronted with a negative model These studies show that stereotype threat can elicit regulatory fit which in turn affects women's leadership aspirations Future directions and limitations are discussed

Morphogenesis, Environmental Stress and Reverse Evolution Jean Guex, John S. Torday, William B. Miller Jr., 2020-07-23 It is widely acknowledged that life has adapted to its environment but the precise mechanism remains unknown since Natural Selection Descent with Modification and Survival of the Fittest are metaphors that cannot be scientifically tested In this unique text invertebrate and vertebrate biologists illuminate the effects of physiologic stress on epigenetic responses in the process of evolutionary adaptation from unicellular organisms to invertebrates and vertebrates respectively This book offers a novel perspective on the mechanisms underlying evolution Capacities for morphologic alterations and epigenetic adaptations subject to environmental stresses are demonstrated in both unicellular and multicellular organisms Furthermore the underlying cellular molecular mechanisms that mediate stress for adaptation will be elucidated wherever possible These include examples of reverse evolution by Professor Guex for Ammonites and for mammals by Professor Torday and Dr Miller This provides empiric evidence that the conventional way of thinking about evolution as unidirectional is incorrect leaving open the possibility that it is determined by cell cell interactions not sexual selection and reproductive strategy Rather the process of evolution can be productively traced through the conservation of an identifiable set of First Principles of Physiology that began with the unicellular form and have been consistently maintained as reflected by the return to the unicellular state over the course of the life cycle
