## White Dwarfs:

**Unlocking the Secrets of White Dwarf Stars** Hugh M. Van Horn, 2014-11-14 White dwarfs each containing about as much mass as our Sun but packed into a volume about the size of Earth are the endpoints of evolution for most stars. Thousands of these faint objects have now been discovered though only a century ago only three were known. They are among the most common stars in the Milky Way Galaxy and they have become important tools in understanding the universe. Yet a century ago only three white dwarfs were known. The existence of these stars completely baffled the scientists of the day and solving the mysteries of these strange objects required revolutionary advances in science and technology including the development of quantum physics, the construction and utilization of large telescopes, the invention of the digital computer, and the ability to make astronomical observations from space. This book tells the story of the growth in our understanding of white dwarf stars set within the context of the relevant scientific and technological advances. Part popular science part historical narrative. This book is authored by one of the astrophysicists who participated directly in uncovering some of the secrets of white dwarf stars. *Unlocking the Secrets of White Dwarf Stars* Hugh Van Horn, 2014-11-19 White dwarfs each containing about as much mass as our Sun but packed into a volume about the size of Earth are the endpoints of evolution for most stars. It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970. Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics. Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months. This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of

greater convenience for the user I 1980 some older Volume 27 contains literature published in 1980 and received before August literature which was received late and which is not recorded in earlier volumes is also included We acknowledge with thanks contributions to this volume by Dr J Bouska Prague who surveyed journals and publications in Czech and supplied us with abstracts in English *Literature 1976, Part 2* S.
