The rise of America as a cultural and political force. As David Leeming's fascinating biography demonstrates, Stephen Spender's life reflected the complexity and flux of the century in which he lived: his sexual ambivalence, his famous friends, the free love days in Germany between the wars, the CIA Encounter scandal. In David Leeming's capable hands, this comprehensive unauthorized study of Spender is a meditation on modernity itself.

Light, 1928 **Experience on the Edge: Theorizing Liminality** Brady Wagoner, Tania Zittoun, 2021-10-19

Liminality has become a key concept within the social sciences, with a growing number of publications devoted to it in recent years. The concept is needed to address those aspects of human experience and social life that fall outside of ordered structures. In contrast to the clearly defined roles and routines that define so much of industrial work and economic life, it highlights spaces of transition, indefiniteness, ambiguity, play, and creativity. Thus, it is an indispensable concept and a necessary counterweight to the overemphasis on structural influences on human behavior. This book aims to use the concept of liminality to develop a culturally and experientially sensitive psychology. This is accomplished by first setting out an original theoretical framework focused on understanding the liminal sources of cultural experience and second, an application of the concept to a number of different domains, such as tourism, pilgrimage, aesthetics, children's play, art therapy, and medical diagnosis. Finally, all these domains are then brought together in a concluding commentary chapter that puts them in relation to an overarching theoretical framework. This book will be useful for graduate students and researchers in cultural psychology, critical psychology, psychosocial psychology, developmental psychology, health psychology, anthropology, and the social sciences, cultural studies, among others.
