Studies In Language Variation:

Studies in Language Variation Ralph W. Fasold, 1977 Many linguists have moved beyond the study of language isolated from its use and have examined the interaction of linguistic rules with the pragmatics of language in context At the same time many scholars have taken a sociological approach to the structure of conversation and other communicative events A number of anthropologists are adding language variation to their traditional interest in language in relation to cultural phenomena Linguists who work in semantics syntax and phonology have also expanded their interests to include language variation From the Preface *Language Variation and Language Change Across the Lifespan* Karen V. Beaman, Isabelle Buchstaller, 2021-03-30 This volume brings together research on panel studies with the aim of providing a coherent empirical and theoretical knowledge base for examining the impact of maturation and lifespan specific effects on linguistic malleability in the post adolescent speaker Building on the work of Wagner and Buchstaller 2018 the present collection offers a critical examination of the theoretical implications of panel research across a range of geographic regions and time periods The volume seeks to offer a way forward in the debates circling about the phenomenon of later life language change drawing on contributions from a variety of linguistic disciplines to examine critical topics such as the effect of linguistic architecture the roles of mobility and identity construction and the impact of frequency effects Taken together this edited collection both informs and pushes forward key questions on the nature of lifespan change making this key reading for students and researchers in cognitive linguistics historical linguistics dialectology and variationist sociolinguistics *Studies in Language Variation*, 1977 Language Variation--European Perspectives Frans Hinskens, 2006-01-01 This volume presents 16 original studies of variation in languages representing the three main European language families as well as in varieties of Greek and Hungarian The studies concern variation in or across dialects or dialect groups in standard varieties or in emerging regional varieties of the standard Several studies investigate a specific linguistic element or structure while others focus on areas of tension between variation and prescriptive standard norms on regional standard varieties and regiolects on problems of linguistic classification from folk linguistic or dialect geographical perspectives and the classification of speakers Language acquisition plays a main role in three studies The studies in this volume represent a range of methods including ethnographic and interpretative approaches conversation analysis analyses of the internal and geographical distribution of dialect features the classification and quantitative analyses of socio demographic speaker background data quantitative analyses of both diachronic and synchronic language data phonetic measurements as well as quasi experimental perception studies The volume thus offers a microcosmic reflection of the macrocosmos of world wide research on variability in originally European languages at the beginning of the 21th century and the linguistic expression of cultural diversity **Studies in Language Variation and Change 2** Catherine Delesse, Elise Louviot, 2018-06-11 This collection of eleven essays traces the complex paths of change taken by the English language in its long history from its Indo European origins to the present day Just like

any other language English is a complex system made up of several interconnected sub systems lexical syntactical phonological morphological and all of those sub systems are subject to change resulting in constant shifts and readjustments Additionally more than some other languages English has a history marked by strong upheavals particularly with the influence of Scandinavian and Romance languages in the Middle Ages The contributions here consider all aspects of that complex history with four of them taking a particular interest in the issues brought about by language contact with French and Latin

Panel Studies of Variation and Change Suzanne Evans Wagner, Isabelle Buchstaller, 2017-09-08 The relationship between the individual and the community is at the core of sociolinguistic theorizing To date most longitudinal research has been conducted on the basis of trend studies such as replications of cross sectional studies or comparisons between present day cross sectional data and legacy data While the past few years have seen an increasing interest in panel research much of this work has been published in a variety of formats and languages and is thus not easily accessible This edited volume brings together the major researchers in the field

of panel research highlighting connections and convergences across and between chapters methods and findings with the aim of initiating a dialogue about best practices and ways forward in sociolinguistic panel studies By providing for the first time a platform for key research on panel data in one coherent edition this volume aims to shape the agenda in this increasingly vibrant field of research

Connecting the Individual and the Community in Sociolinguistic Panel Research Isabelle Buchstaller, Karen V. Beaman, 2025-10-31 This collection engages with key questions in panel study research by exploring more deeply the interrelationship between the individual and the community and the impact on language change across the lifespan The book is organized around four broad themes each followed by a forward looking commentary that ties together the key findings from the individual chapters The first section examines style and socio indexicality with the goal of disentangling short term style shifting from long term language change The second section continues with a focus on style examining audience design and socially meaningful variation in professional settings as an integral component of age and role appropriate behavior The third section considers different language dialect contact scenarios and the impact on changing social identities and behavioural norms which can fluctuate across the lifespan for different settings and life stages and for different types of variables The final section explores a computational agent based model of lifespan and community change targeting the practical challenges often encountered in panel research such as data sparsity and the short duration of the human lifespan A postscript underscores the importance of considering style and setting as integral aspects of panel research rather than as afterthoughts and of leveraging computational modeling to expand our understanding of the interdependencies between lifespan and community change This book will appeal to scholars interested in language variation and change sociolinguistics historical linguistics and computational linguistics

Language Variation on Jamaican Radio Michael Westphal, 2017-12-14 This volume presents an in depth analysis of language variation in Jamaican radio newscasts and talk shows It explores the interaction of global and local varieties of English with regard to newscasters and talk show hosts language use and listeners attitudes The book illustrates the benefits of an integrated approach to mass media the analysis takes into account radio talk and the perception of the audience it is context sensitive paying close attention to variation within and between genres and it combines quantitative and qualitative approaches to demonstrate the complexity of language in the media The book contributes to our understanding of the dynamics of World Englishes in the 21st century and endonormative stabilization processes in linguistically heterogeneous postcolonial speech communities and shows how mass media both challenge and reproduce sociolinguistic stratification This volume will be relevant for researchers interested in the fields of sociolinguistics language attitudes and language in the media

Language Variation and Change in Mandarin Li Ling, 1991

Variation in South Asian Languages Pritha Chandra, 2023-09-08 The book addresses some raging questions in linguistics today What kind of variation do typologically related languages display Do we expect to find the same variation in genealogically unrelated languages spoken in the same

area What makes dialects different The current book answers these questions using data from languages spoken in the Indian subcontinent an area known for its linguistic richness and diversity Each chapter in the book presents a wealth of data collected through extensive fieldwork or controlled experimental setups The chapters examine macro variation in relative clauses word order and negation found among Austro Asiatic Dravidian Indo Aryan and Tibeto Burman languages It also investigates meso level variation among related Eastern Indo Aryan languages and intra language and dialectal changes It encourages scholars to probe deep into the mechanisms that underlie the immense intra and inter language variation in the area It serves as a resource book for postgraduate and research scholars of linguistic typology theoretical syntax sociolinguistics historical linguistics and for scholars interested in South Asian languages

Resources in Education, 1987-10 Sociolinguistic Variation in Children's Language Jennifer Smith, Mercedes Durham, 2019-05-23 Investigates when and how preschool children acquire the vernacular norms of the community they come from *The Evolution of Englishes* Sarah Buschfeld, Thomas Hoffmann, Magnus Huber, Alexander Kautzsch, 2014-09-15 This two part volume provides a collection of 27 linguistic studies and contributions that shed light on the evolution of different Englishes world wide varieties learner Englishes dialects creoles from a broad spectrum of different perspectives including both synchronic and diachronic approaches What makes the volume unique is that it is the first ever contribution to the field which includes a section exclusively committed towards testing discussing and refining Schneider's 2007 Dynamic Model against recent realities of English world wide Part 1 These realities include a wide variety of case studies ranging from regions socio linguistically as diverse as South Africa the Phillipines Cyprus or Germany Part 2 goes beyond the Dynamic Model and offers both empirical and theoretical perspectives on the evolution of World Englishes In doing so it provides contributions with a theoretical focus on the topic as well as cross varietal accounts it sheds light on individual Englishes from different geographical regions and offers new perspectives on old varieties The Coherence of Linguistic Communities Karen V. Beaman, Gregory R. Guy, 2022-05-04 This innovative collection brings together a range of perspectives on the notions of orderly heterogeneity and social meaning shedding light on how structured variation and indexicalities of social meaning cohere within linguistic communities This book fills a gap in research on language variation by critically considering the position articulated by Weinrich Labov and Herzog in 1968 that linguistic diversity is systematically organized in ways that reflect and construct social order The volume investigates such key themes as covariation and co occurrence restrictions indexicality perception and social meaning coherence and language change and the structure and measurement of coherence at different levels of analysis This collection advances our understanding of the coherence of linguistic communities through empirical investigations of larger and more diverse sets of variables language varieties speech styles and communities as afforded by the development and advancement of new methods and models in sociolinguistic research This book is of interest to scholars in sociolinguistics language variation and change and formal linguistics as well as those interested in

developments on research methods in linguistics

Studies in Linguistic Variation and Change Brian Lowrey, Fabienne

Toupin, 2015-10-05 This book comprises a series of studies by a number of scholars working on what might broadly be termed the medieval period of the history of English focusing on Old English Middle English and the relatively less well documented period of transition from the former to the latter The volume brings together contributions not only from a variety of fields ranging from semantics and syntax to prosody and phonology but also from different theoretical standpoints in order to improve the reader's understanding of the rapid changes that affect the language at this time The collection of papers here should be of interest to all scholars and students working on Old or Middle English as well as to students of historical linguistics in general given that many of the processes and methodological parameters described here will prove to be directly applicable to the study of other periods and of other languages

Style Nikolas Coupland, 2007-08-09 Style refers to ways of speaking how speakers use the resource of language variation to make meaning in social encounters This 2007 book develops a coherent theoretical approach to style in sociolinguistics illustrated with copious examples It explains how speakers project different social identities and create different social relationships through their style choices and how speech style and social context inter relate Style therefore refers to the wide range of strategic actions and performances that speakers engage in to construct themselves and their social lives Coupland draws on and integrates a wide variety of contemporary sociolinguistic research as well as his own extensive research in this field The emphasis is on how social meanings are made locally in specific relationships genres groups and cultures and on studying language variation as part of the analysis of spoken discourse
