There is increased interest in literacy as a multimodal concept in which symbolic meaning is a central concept rather than more conventional and narrower notions of literacy. The Handbook of Early Childhood Literacy is central in providing access to all these different perspectives. The Handbook offers a way through the vast diversity of publications on early childhood literacy by providing comprehensive and up to date reviews of research and thinking in early childhood literacy. The arrangement of chapters reflects a contemporary perspective on research into early childhood literacy. Major sections include the global world of early childhood literacy, childhood literacy and family, community and culture, the development of literacy in early childhood, pedagogy and early childhood literacy and researching early childhood literacy. Contributions by leading authorities focus on literacy as a socially situated and global experience, one that is evolving in relation to changes in contemporary culture and technological innovation.
