religious contact in the study of religion Resulting from the final conference of the K te Hamburger Kolleg Dynamics in the
History of Religions one of the largest research initiatives in the interdisciplinary study of religion worldwide in recent years
2008 2020 this book encapsulates the twofold aim of this conference first to step back and reflect upon the merits and
challenges of studying religious dynamics as a result of intra inter and extra religious contact and second to look beyond and
pave ways for future approaches to study religion as a social phenomenon HabitusAnalysis 2 - Praxeology and Meaning
Heinrich Wilhelm Schäfer,2019-11-07 Starting from the sociology of Pierre Bourdieu Sch fer composes a methodical
approach to habitus of social actors and the logic of their praxis Building upon the generative terms of praxeology he focuses
on identity and strategy in processes of internalization their transformation by means of dispositional schemes and their
externalization in action The emphasis lies on a theory of dispositions that allows a flexible understanding of identity and
strategy formation in the context of social experience and the interplay with social structures This theory is developed over
the course of a three step analysis on habitus as a network of dispositions on the dynamics that unfold between the logic of
socio structural processes and practical logic and on the praxeological assessment of social structures via models of fields
and the social space This book is the second of three volumes of HabitusAnalysis While the first volume deals with the
epistemological underpinnings of praxeology this book advances Bourdieu s theory with a special focus on creativity of action
in the context of social structures thereby preparing the methodological design of empirical models in the third volume
