Corrado Priami,2003-11-24 This book constitutes the revised refereed summary of the results presented during the European IST FET proactive initiative s Global Computing workshop GC 2003 held in Rovereto Italy in February 2003 The eight revised full papers and survey articles presented together with a detailed introductory overview assess the state of the art in global computing Global computing attempts to develop models frameworks methods and algorithms to build systems that are flexible dependable secure robust and efficient The dominant technical issues are coordination interaction security safety scalability robustness mobility risk management performance analysis etc

Tutorial, Interconnection Networks for Parallel and Distributed Processing Chuan-lin Wu,Tse-yun Feng,1984 *Concurrent Object-Oriented Programming and Petri Nets* Gul A. Agha,2001-04-18 Concurrency and distribution have become the dominant paradigm and concern in computer science Despite the fact that much of the early research in object oriented programming focused on sequential systems objects are a natural unit of distribution and concurrency as elucidated early on by research on the Actor model

Thus models and theories of concurrency the oldest one being Petri nets and their relation to objects are an attractive topic of study This book presents state of the art results on Petri nets and concurrent object oriented programming in a coherent and competent way The 24 thoroughly reviewed and revised papers are organized in three sections The first consists of long papers each presenting a detailed approach to integrating Petri nets and object orientation Section II includes shorter papers with emphasis on concrete examples to demonstrate the approach Finally section III is devoted to papers which significantly build on the Actor model of computation
