common mood disorder and it is spreading like a viral contagion You can t catch depression in the same way you catch a cold
but the latest research provides overwhelming support that moods spread through social conditions defining depression as
more a social problem than a medical illness Our social lives directly shape our brain chemistry and powerfully affect the way
we think and feel and our brains can change for the better with healthy social circumstances as much as they can change
with medication Drugs may address some of depression s symptoms but Dr Yapko convincingly argues that we need to treat
depression at its root by building social skills and improving relationships in order to halt the spread of this debilitating
