**Strategic Decision-Making. A Practical Example Based on "Tesla"** Lukas Wagner,2018-11-29 Essay from the year 2017 in the subject Business economics Business Management Corporate Governance grade 1 0 Tongji University language English abstract Decision making is a fundamental skill for any successful executive But decisions at strategic level are hard to make They require large amounts of resources and commitments which may be irreversible They involve long term consequences that are hard to predict And they require considering multiple often conflicting strategic objectives which are difficult to balance particularly in the presence of risk and uncertainty Research and thinking about modern business strategy emerged as a field of study and practice in the 1960s Prior to that time the words strategy and competition rarely appeared in the most prominent management literature When influential academics in the USA started to think fundamentally about strategic decision making in the 1980s and 90s they made the assumption that everything works in a competitive working free market and developed thereof generic strategy tools that are supposed to work everywhere

However Elmes the guest speaker argues that they are not well founded since strategies need to be developed in the respective context of an industry or market This position will be explained in more detail during this essay Especially the determinant of market efficiency meaning how competitive a market is strongly influences the development of strategic decisions There are many industries where government involvement or asymmetric competition need to be considered to make strategic decisions whereby generic strategy tools tend to be ineffective Therefore the key questions for this essay will be firstly what are the traditional concepts of strategy and how have they involved secondly what actually makes a strategy successful and lastly how does it apply in practice *Strategic Manufacturing for Competitive Advantage* Steve Brown,1996 This book concentrates on the strategic role and importance of production operations enabling the firm to be competitive in global markets The first chapter on strategic issues provides an important framework for the rest of the book Human resource management and new product development are given chapters of their own and the chapter on manufacturing strategy provides an exhaustive discussion of key areas Endorsements There is no single text that I can think of which is as soundly written on the subject as this one The perspective is clearly based on 20 20 vision the toolkit is knowledgeably and freshly laid out and the supporting evidence described by a person obviously and freshly laid out and the supporting evidence described by a person obviously master of his subject Dr Tom Mullen Strathclyde Graduate Business School University of Strathclyde A timely book which is a step ahead of competing texts by demanding proper consideration be given to production and human resource operations in the top planners inner sanctum This text demonstrates how to achieve competitive and desired results Strategy and tactics are rarely so thoroughly examined in a way to help the manager and employer alike to meet the new global challenge of the 21st century Dr Manton C Gibbs Professor of Strategic Studies International Journal of Commerce and Management Readings in Strategic Management Arthur A. Thompson,1995
