Zee,2000-02 This paper discusses important tax policy issues facing developing countries today It views tax policy from both the macroeconomic perspective which focuses on broad questions such as the level and composition of tax revenue and the microeconomic perspective which focuses on certain design aspects of selected major taxes such as the personal income tax the corporate income tax the value added tax excises and import tariffs It provides a review of the rote of tax incentives in these countries and identifies some policy challenges posed by the globalization of the world economy      Tax Policy for Developing Countries Vito Tanzi,2001      *Taxation in Developing Countries* Roger Gordon,2010-07-05 Taxes are a crucial policy issue especially in developing countries Just recently proposals to raise middle class taxes toppled the Bolivian government and plans to extend or increase the value added tax caused political unrest in Ecuador and Mexico Despite the impact of tax policy on developing countries a comprehensive study has yet to be written Treating Argentina Brazil India Kenya Korea and Russia as key case studies this volume outlines the major aspects of current tax codes and explores their economic and political implications Examples of both the poorest and wealthiest developing countries Argentina Brazil India Kenya Korea and Russia uniquely demonstrate the diverse fiscal problems of tax reform Each economy relies heavily on indirect and corporate income taxes though recently some have reduced their tariff rates and have switched from excise to value added taxes There is a large informal economy in most of these countries and tax evasion by firms is a significant

concern As a result tax revenue remains low even though rates are as high as those in developed economies Also unconventional methods to collect revenue have been implemented including bank debit taxes state ownership of firms and implicit taxes on individuals in the informal sector Exploring these and other concerns as well as changes in tax law administration and fiscal pressures this comprehensive anthology clarifies the current landscape of tax administration and the economic future of the world s poorer economies **Tax Policy in Developing Countries** ,1994 Taxation and State-Building in Developing Countries Deborah Brautigam,Odd-Helge Fjeldstad,Mick Moore,2008-01-10 There is a widespread concern that in some parts of the world governments are unable to exercise effective authority When governments fail more sinister forces thrive warlords arms smugglers narcotics enterprises kidnap gangs terrorist networks armed militias Why do governments fail This book explores an old idea that has returned to prominence that authority effectiveness accountability and responsiveness is closely related to the ways in which governments are financed It matters that governments tax their citizens rather than live from oil revenues and foreign aid and it matters how they tax them Taxation stimulates demands for representation and an effective revenue authority is the central pillar of state capacity Using case studies from Africa Asia Eastern Europe and Latin America this book presents and evaluates these arguments updates theories derived from European history in the light of conditions in contemporary poorer countries and draws conclusions for policy makers *Tax Policy and Economic Development* Richard Miller Bird,1992 Evaluation of the unique conditions that apply to developing nations and an examination of their impact on both the kinds of taxes that may be raised and the effective administration of tax policy Readings on Taxation in Developing Countries Richard Miller Bird,Oliver Oldman,1967 Compilation of articles on taxation policy in developing countries and the impact thereof on economic development covers fiscal policy the structure of the taxation system incl In respect of income land ownership sales and consumption the retail trade property ownership etc and includes financial aspects and administrative aspects thereof Bibliography pp 537 to 547 and statistical tables Tax in Developing Countries Great Britain: Parliament: House of Commons: International Development Committee,2012-08-23 This report highlights the importance of tax collection in developing countries and recommends that the UK s aid programme should increase its focus on supporting tax authorities This is equally valid for all forms of taxation including VAT personal income taxation and corporate taxation It is also essential that taxes are paid on a fair and equal basis by all New tax rules on developing countries the Controlled Foreign Companies CFC rules are designed to discourage UK owned corporations from using tax havens Traditionally these rules have applied to all UK owned corporations both those operating in the UK and those operating overseas Under the new rules however this will apply only to corporations operating in the UK making it easier for those operating in developing countries to use tax havens A number of NGOs have campaigned vigorously against the changes with ActionAid estimating that developing countries may lose up to 4 billion in tax revenues as a result The UK Government does not accept this estimate

but does not deny that there will be some cost to developing countries The Committee recommends that subject to the outcome of its own analysis the Government should consider reversing the change as a matter of urgency The Committee also received evidence which argued that the Government should require UK owned companies to report their financial information on a country by country basis rather than on an aggregate basis The Government is reluctant to act unless other EU countries do likewise but the Committee believes that it should act unilaterally
