White,1992 World Class IT Peter A. High,2009-12-09 World Class IT Technology is all around us It is so pervasive in our daily lives that we may not even recognize when we interact with it Despite this fact many companies have yet to leverage information technology as a strategic weapon What then is an information technology executive to do in order to raise the prominence of his or her department In World Class IT recognized expert in IT strategy Peter High reveals the essential principles IT executives must follow and the order in which they should follow them whether they are at the helm of a high performing department or one in need of great improvement Principle 1 Recruit train and retain World Class IT people Principle 2 Build and maintain a robust IT infrastructure Principle 3 Manage projects and portfolios effectively Principle 4 Ensure partnerships within the IT department and with the business Principle 5 Develop a collaborative relationship with external partners The principles and associated subprinciples and metrics introduced in World Class IT have been used by IT and business executives alike at many Global 1000 companies to monitor and improve IT s performance Those principles pertain as much to the leaders of IT as they do to those striving to emulate them **Putting Customers First** National Performance Review (U.S.),Al Gore,1995 Serving the American Public Albert Gore,1996 **90 World-Class Activities by 90 World-Class Trainers** Elaine Biech,2006-12-05 90 World Class Activities by 90 World Class Trainers gathers classic activities from ninety master trainers in one convenient place The stellar list of trainers includes Bellman Blanchard Booher Crum de Bono Kouzes Masie Pike Robinson Scannell Silberman Thiagi Zenger and 77 other names you ll know Elaine Biech editor of the Pfeiffer Annuals and author of Training for Dummies has gathered a powerful and exciting collection of activities from around the globe The sixteen topics include change management coaching diversity leadership and teamwork This invaluable resource presents the favorite activities of some of the most talented trainers in the world all seven continents are represented All of these activities have stood the test of time and are presented here for your use to engage teams and groups in collaborative learning The contributors provide helpful suggestions for adapting the activities to a particular setting or audience and present ideas for adding zest to their favorite activities to ensure that you are as successful with them as they have been The book is filled with experience and expertise Combined the contributors have written and edited almost 800 books and over 3 700 articles and have received hundreds of awards Many are members of the HRD Hall of Fame and they advise some of the largest organizations in the world Draw on their expertise and implement several of the activities Your success is guaranteed **World Defence Systems** ,2001 **World Development Report 2018** World Bank Group,2017-10-16 Every year the World Bank s World Development Report WDR features a topic of central importance to global development The 2018 WDR LEARNING to Realize Education s Promise is the first ever devoted entirely to education

And the time is right education has long been critical to human welfare but it is even more so in a time of rapid economic and social change The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education The 2018 WDR explores four main themes First education s promise education is a powerful instrument for eradicating poverty and promoting shared prosperity but fulfilling its potential requires better policies both within and outside the education system Second the need to shine a light on learning despite gains in access to education recent learning assessments reveal that many young people around the world especially those who are poor or marginalized are leaving school unequipped with even the foundational skills they need for life At the same time internationally comparable learning assessments show that skills in many middle income countries lag far behind what those countries aspire to And too often these shortcomings are hidden so as a first step to tackling this learning crisis it is essential to shine a light on it by assessing student learning better Third how to make schools work for all learners research on areas such as brain science pedagogical innovations and school management has identified interventions that promote learning by ensuring that learners are prepared teachers are both skilled and motivated and other inputs support the teacher learner relationship Fourth how to make systems work for learning achieving learning throughout an education system requires more than just scaling up effective interventions Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress building coalitions for learning and taking an adaptive approach to reform
