Valderrama, 1991 As with previous symposiums the main objective of the Sixth International Symposium is to publish papers of both technical and practical nature to present new findings uncovered by theoretical results which may have the potential to contribute solutions to real life problems With this objective in mind this collection of papers aims to serve as an interface between stochastic modeling and data analysis as well as their applications to the problems we face in the various fields The papers first focused on the theory application and interaction between stochastic models and data analysis The results and their applications to the problems we face in the fields of economics finance and insurance management marketing health sciences production and engineering are then explored **TRON Project 1988** Ken Sakamura, 1989-01-18 It has been almost 5 years since the inauguration of the TRON project a concept first proposed by Dr K Sakamura of the University of Tokyo The TRON Association which was founded as an independent organization in March 1988 has been taking over the activities of the earlier TRON Association which was a division of Japan Electronic Industry Development Association JEIDA It has been expanding various operations to globalize the organizations activities The number of member companies already exceeds 100 with increasing participation from overseas companies It is truly an awaring historical event that so many members with the same qualifications and aims engaged in the research and development of the computer environment could be gathered together The TRON concept aims at the creation of a new and

complete environment beneficial to both computer and mankind It has a very wide scope and great diversity As it includes the open architecture concept and as the TRON machine should be able to work with various foreign languages the TRON is targeted to be used internationally In order for us to create a complete TRON world at though there are several TRON products already on the market continuous and aggressive participation from as members together with concentration as further development are indispensable We the TRON promoters are much encouraged by such a driving force
