The Border:

The Border Magazine Nicholas Dickson, William Sanderson, 1898 *Informal Trade, Gender and the Border Experience* Dr Olga Sasunkevich, 2015-12-28 Detailing the history of a well known phenomenon of post socialism cross border petty trade and smuggling as the history of a practice in daily life from a gendered perspective this book considers how changes in these practices in a particular border region between Belarus and Lithuania have been accompanied and to some extent provoked by changes in the border regime It looks at how the selective openness of the Belarus Lithuania border worked during different periods over the last twenty years and how it influenced the involvement of different social groups in shuttle trade practices Foremost this book considers how political borders implement and or intensify social boundaries and suggests that the selective openness of political borders a prerequisite for the existence of female shuttle trade activities is primarily built upon people s social characteristics However it claims that what can be seen as the grounds for growing inequality at a global level at a local one may have an important resourceful meaning for various social groups including those usually perceived as disadvantaged such as widowed female retirees or unemployed single women with children

Ensuring We Have Well-trained Boots on the Ground at the Border United States. Congress. House. Committee on Homeland Security. Subcommittee on Management, Investigations, and Oversight, 2009

Both Sides of the Border Linda Fernandez, Richard T. Carson, 2005-12-30 The Mexican United States border represents much more than the meeting place of two nations Our border communities are often a line of first defense absorbing the complex economic environmental and social impacts of globalization that ripple through the region In many ways our success or failure in finding solutions for the environmental social and economic issues that plague the region may well define our ability to meet similar challenges thousands of miles from the border zone Border residents face the environmental security

concerns posed by water scarcity and transboundary air pollution the planning and infrastructure needs of an exploding population the debilitating effects of inadequate sanitary and health facilities and the crippling cycle of widespread poverty Yet with its manifold problems the border area remains an area of great dynamism and hope a multicultural laboratory of experimentation and grass roots problem solving Indeed as North America moves towards a more integrated economy citizen action at the local level is pushing governments to adapt to the driving forces in the border area by creating new institutional arrangements and improving old ones If there is one defining feature of this ground up push for more responsive transboundary policies and institutions it is a departure from the closed formalistic models of the past to a more open transparent and participatory model of international interaction

British Columbia's Borders in Globalization Nicole Bates-Eamer, Helga Kristín Hallgrímsdóttir, 2021-11-24 This book is a case study collection examining the influences and functions of British Columbia's BC borders in the 21st century British Columbia's Borders in Globalization examines bordering processes and the causes and effects of borders in the Cascadian region from the perspective of BC The chapters cover diverse topics including historical border disputes and cannabis culture and identity the governance of transboundary water flows migration and preclearance policies for goods and people and the emerging issue of online communities The case studies provide examples that highlight the simultaneous but contradictory trends regarding borders in BC while boundaries and bordering processes at the external borders shift away from the territorial boundary lines self determination local politics and cultural identities re inscribe internal boundaries and borders that are both virtual and real Moreover economic protectionism racial discourses and xenophobic narratives driven by advances in technology reinforce the territorial dimensions of borders These case studies contribute to the literature challenging the notion that territorial borders are sufficient for understanding how borders function in BC and in a few instances they illustrate the nuanced ways in which borders or bordering processes are becoming detached from territory The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies
