Each practice described in the book has been carefully chosen to shine light on areas that are likely to arise as the grieving and healing journey unfolds, and have been organized to make it easy for the reader to choose a path they feel drawn to at any particular moment. *The Art of Grieving* brings the body and mind connection into the spotlight, an essential link in the healing process that will allow readers to take charge of their wellness and emotional health. **Spinoza, Ecology and International Law** Moa De Lucia Dahlbeck, 2018-09-12. This book addresses the use of Benedict Spinoza's philosophy in current attempts to elaborate an ecological basis for international environmental law. Because the question of environmental protection has not been satisfactorily resolved, the legal debate concerning our responsibility for the environment has, as evidenced in the recent UN report series *Harmony with Nature*, come to invite calls for a new eco-centric rather than anthropocentric legal paradigm. In this respect, Spinoza appears as a key figure. He is one of the few philosophers in the history of western philosophy who cares and writes extensively about the roots of anthropocentrism, the core issue of contemporary normative debates in ecology. And in response to the rapidly developing ecological crisis, his work has become central to a rethinking of the human relationship with nature. Addressing the contention that Spinoza's ethics might provide a useful source for developing a new eco-centred framework for environmental law, this book elaborates a more nuanced understanding of Spinoza's philosophy. Spinoza cannot, it is argued here, simply be reduced to an eco-ethicist. That is his

metaphysics cannot be used as basis of an essentially naturalised or extended human morality At the same time however this book argues that the radicality of Spinoza s naturalism nevertheless offers the possibility of developing a more adequate ecological basis for environmental law
