The Logic Of Practice:

The Logic of Practice Pierre Bourdieu, 1990 Our usual representations of the opposition between the civilized and the primitive derive from willfully ignoring the relationship of distance our social science sets up between the observer and the observed In fact the author argues the relationship between the anthropologist and his object of study is a particular instance of the relationship between knowing and doing interpreting and using symbolic mastery and practical mastery or between logical logic armed with all the accumulated instruments of objectification and the universally pre logical logic of practice In this his fullest statement of a theory of practice Bourdieu both sets out what might be involved in incorporating one s own standpoint into an investigation and develops his understanding of the powers inherent in the second member of many oppositional pairs that is he explicates how the practical concerns of daily life condition the transmission and functioning of social or cultural forms The first part of the book Critique of Theoretical Reason covers more general questions such as the objectivization of the generic relationship between social scientific observers and their objects of study the need to overcome the gulf between subjectivism and objectivism the interplay between structure and practice a phenomenon Bourdieu describes via his concept of the habitus the place of the body the manipulation of time varieties of symbolic capital and modes of domination The second part of the book Practical Logics develops detailed case studies based on Bourdieu s ethnographic fieldwork in Algeria These examples touch on kinship patterns the social construction of domestic space social categories of perception and classification and ritualized actions and exchanges This book develops in full detail the theoretical positions sketched in Bourdieu s Outline of a Theory of Practice It will be especially useful to readers seeking to grasp the subtle concepts central to Bourdieu s theory to theorists interested in his points of departure from structuralism especially from L vi Strauss and to critics eager to understand what role his theory gives to human agency It also reveals Bourdieu to be an anthropological theorist of considerable originality and power

Re-Thinking International Relations Theory via Deconstruction Badredine Arfi, 2013-03-01 International Relations IR theorists have ceaselessly sought to understand explain and transform the experienced reality of international politics Running through all these attempts is a persistent yet unquestioned quest by theorists to develop strategies to eliminate or reduce the antinomies contradictions paradoxes dilemmas and inconsistencies

dogging their approaches A serious critical assessment of the logic behind these strategies is however lacking This new work addresses this issue by seeking to reformulate IR theory in an original way Arfi begins by providing a thorough critique of leading contemporary IR theories including pragmatism critical scientific realism rationalism neo liberal institutionalism and social constructivism and then moves on to strengthen and go beyond the valuable contributions of each approach by employing the logic of deconstruction pioneered by Derrida to explicate the consequences of taking into account the dilemmas and inconsistencies of these theories The book demonstrates that the logic of deconstruction is resourceful and rigorous in its questioning of the presuppositions of prevailing IR approaches and argues that relying on deconstruction leads to richer and more powerfully insightful pluralist IR theories and is an invaluable resource for taking IR theory beyond currently paralyzing wars of paradigms Questioning universally accepted presuppositions in existing theories this book provides an innovative and exciting contribution to the field and will be of great interest to scholars of international relations theory critical theory and international relations

A Study in the Logic of Value Mary Evelyn Clarke, 1929 **The Logic of Hegel** Georg Wilhelm Friedrich Hegel, William Wallace, 1874 *The History and Theory of Legal Practice in China* Philip C.C. Huang, Kathryn Bernhardt, 2014-09-03 *The History and Theory of Legal Practice in China* Toward a Historical Social Jurisprudence goes beyond the either/or dichotomy of Chinese vs Western law tradition vs modernity and the substantive practical vs the formal It does so by proceeding not from abstract legal texts but from the realities of legal practice Whatever the declared intent of a law it must in actual application adapt to social realities It is the two dimensions of representation and practice and law and society that together make up the entirety of a legal system The assembled articles by the editors and a new generation of Chinese scholars illustrate a new historical social jurisprudence and explore the possible conceptual underpinnings of a modern Chinese legal system that would both accommodate and integrate the unavoidable paradoxes of contemporary China

Migration and Educational Policymaking in China Hui Yu, 2022-07-21 By concentrating on the topic of school enrolment policy for rural to urban migrant children in China this book analyses the unequal power relations and structural inequalities that can appear in the context of education The author complements current knowledge by applying theoretical resources of policy sociology in particular the thinking of Pierre Bourdieu into analysis of educational policymaking in the Chinese context He takes a policy trajectory approach to trace the unequal power relations and structural inequalities invested and realised in the school enrolment policy Rooted in rich qualitative data from five metropolises he examines both external influences of politics economy and public policy on educational policy agenda setting and discursive practices within the educational policy cycle inherent in the post 2013 restrictive school enrolment policy Structural constraints and agency in the local context are also
