VED from VICTORIA INSTITUTIONS

The Touch Code:

Software codes of mantra, tantra, witchcraft, black magic, evil eye, evil tongue &c. VED from VICTORIA INSTITUTIONS, This book can be downloaded as a PDF file from here Prologue This is not a guide book for studying any occult art Instead it is a writing that proposes to take up the possibility of there being a real machinery behind the working of so called mantra tantra evil eye black magic voodoo etc This book does not teach any of the above mentioned arts Print book is available on lulu com Yet it does try to find a pathway or opening by which we can find or enter the supernatural arena from where the supernatural software codes of reality and life is designed and maintained It is a writing that tries to discuss a probability that is not connected to material sciences Instead it proposes to examine the possibility of there being a supernatural software application location wherein reality might be seen in the code view as well as the design view These two views are apart from the real view which is the physical reality The ultimate aim of this book is to propose a pathway via which we can approach the supernatural software location where all of reality life living organisms brain software English versus the feudal languages around 1989 The final version of the book was completed around 2000 In the concluding part of that book I did hint about the possibility of there being something akin to a software background to reality And that languages are software applications with varied capacities In around the year 2005 I wrote a series of posts in a GB website on the same subject It was basically a lot of unconnected themes all pointing to the same theme This I later published as a digital book under the name Software codes of reality life and languages Then my next major book on the subject came out with the name Codes of reality What is language Here again the same theme of connecting the idea of there being a software realm behind reality and that languages have software codes which can directly connect to the software of reality was elaborated The focus was on languages being sort of software applications through which physical reality could be influenced Still the theme was going forward only in very brief paces A few years ago I had to write a series of posts for supporting the contentions of Homoeopathy by basing the ideas from my understandings That Homoeopathy does work on the principle of a software program rectifying the software of life and human body The book title was The machinery of Hom oopathy Recently I happened to read Edgar Thurston s Omens and Superstitions of Southern India It was at that time that I pondered upon reworking out the arguments from the perspective of mantra tantra black magic witchcraft etc The first thing I did was to create a very readable form of that book As I went on doing that work I could get to read the book also This present book is being promoted as a Commentary on Omens and Superstitions of Southern India However only the last part of this book really is a sort of commentary Even in that part it is not exactly a commentary I merely quoted some sentences from his book and elaborated upon them as per what I wanted to convey Edgar Thurston s Omens and Superstitions of Southern India is definitely a great book My writings do not aim to go against that book This book of mine does contain a lot of mentions about Thurston s book This book commences by mentioning OMENS AND SUPERSTITIONS OF SOUTHERN INDIA However it

moves beyond to a wider ambit It returns to Thurston s book at the end as a commentary However a mention of Thurston s book can be felt all along I have used a few images from other old public domain books These images are mainly taken from my own collection from such books Due to some issues I do not have the exact record as to where I got some of the images I believe that such images have been taken from Edgar Thurston s *Castes and Tribes of Southern India* Before commencing the reading of the book the reader is further informed that in various locations the text would seem to be dealing with cultural aspects However without clearly mentioning these things it would difficult to go directly into the effects of supernatural software codes
