

Trisection of angles

Of ferman: Fernando Mancebo Rodriguez--- 2019

Compass N-section of angles and segments

ferman 2019

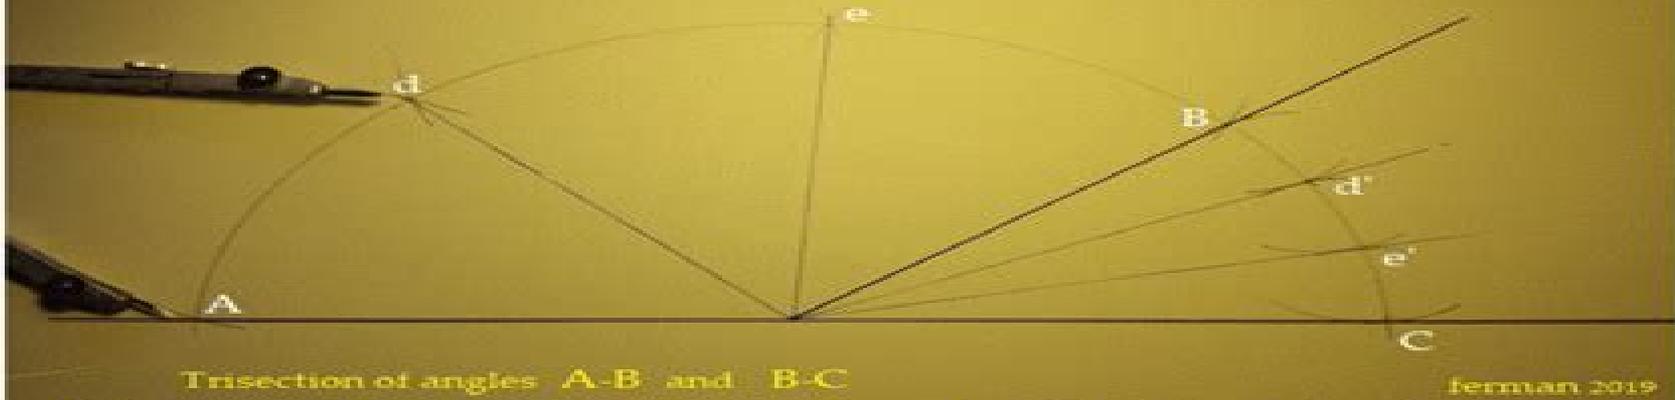

Measurements with compass

Starting with A or B, and turning the compass to go supporting it at the points c and d, we go closing or opening the compass until the exact divisions between A and B coincide. When they coincide we mark points c and d.

With this method (compass) we can section, chop and mark angles, segments, rulers, etc.

Easy trisection of angles and segments

With the compass at one end of the angle to trisect A or B (B or C) we take and test successive measurements (with support in d and e) until they coincide exactly in A and B. Once they coincide, we mark the intermediate points d and e, and draw the section lines.
