Strategic Planning in Technology Transfer to Less Developed Countries Christian Madu, 1992-01-27 Despite an avalanche of literature over the last 30 years there has been relatively little written on the role played by strategic planning in the transfer of technology particularly from developed to less developed countries Technology transfer which involves the acquisition of inventive activity by secondary users is conceded vital to socio economic growth but usually it is looked at internationally from a micro perspective Unlike other books Madu s volume looks at technology transfer holistically It examines the advantages of technology transfer and its limitations by viewing recipient nations as systems in which social economic behavioral and political influences converge to help shape technological decisions Only when a systems perspective like this is adopted and technology seen as a strategic variable can technology transfer be understood and successfully implemented says Madu Madu thus identifies the failures of technology transfer as the result of malfunctions in three components of the system technology structure and behavior He analyzes these malfunctions offers ways to repair them and considers technology from the viewpoints of both transferrer and receiver whose missions goals and objectives are often not only disparate but sometimes in conflict He then offers what he calls prescriptive frameworks and guidelines to help implement transfer and to see it as a variable that must be integrated into national development planning Throughout Madu makes it clear that the objective of technology transfer is the maximizing of social welfare Using this overarching premise he is able to evaluate both the benefits and the social costs associated with technology transfer and to develop his prescriptive integrative models Intended for specialists in international finance and development and international business management Madu s book will be of special value to teachers of graduate courses in socio economic development public policy and economics and to policymakers throughout government

Managing Green Technologies for Global Competitiveness Christian Madu,1996-01-09 Environmental quality management is seen as a competitive strategy that could help a firm improve its bottom line It is argued that being environmentally correct is good business that can provide competitive advantage to the firm in the long term and help it to survive and remain in business To achieve environmental quality top management must take the lead and refocus its objectives by redefining its customers Rather than a focus only on direct customers who are consumers of the product emphasis should be on the stakeholders of the environment since they can potentially influence the cost of doing business The book starts by tracing the relationship between technology and the environment Clearly the quality of life we enjoy today is to a large extent a result of technological advances However environmental pollution is a byproduct of such advances and

has contributed in declining the quality of life Sustainable development is increasingly seen as a way of both maintaining technological advances and environmental quality However many have argued against sustainable development without looking at its long term goals and its potential of helping a business improve its bottom line and competitiveness Clearly there is a need for strategic planning in order to remain competitive through environmental quality planning A corporate environmental quality model is therefore needed Environmental quality management can also benefit from developments in the total quality management area A great deal of attention is focused on how this could be achieved by adopting tools from total quality management establishing environmental quality award programs and conducting environmental quality assessment The book concludes by focusing on the needs to conserve the earth s limited natural resources and discussing some of the major environmental laws in the United States designed to protect the environment South Asia Bibliography and Documentation: Science and technology B.
