Strategy As Practice An Activity Based Approach:

Strategy as Practice Gerry Johnson, Ann Langley, Leif Melin, Richard Whittington, 2007-08-02 Research in strategy has shifted significantly towards strategy as something organizations have rather than strategy as something that managers do. The activities of the people who actually manage and develop organizational strategy have become marginalized. Strategy as Practice argues the reverse that research on strategy needs to take seriously what strategists do and the effects of what they do. Written by a distinguished team of researchers and educators this book sets out a research agenda, provides guidelines on theoretical perspectives and alternative methodologies for research on practice as well as commentaries on published illustrative papers that exemplify the practice perspective. Strategy as Practice will be essential reading for doctoral students, researchers and academics who wish to understand or undertake research in this important field of management research.

Cambridge Handbook of Strategy as Practice Damon Golsorkhi, Linda Rouleau, David Seidl, Eero Vaara, 2010-08-26 The Cambridge Handbook of Strategy as Practice provides a comprehensive overview of an emerging and growing stream of research in strategic management. An international team of scholars has been assembled to produce a systematic introduction to the various epistemological, methodological and theoretical aspects of the strategy as practice approach. This perspective explores and explains the contribution that strategizing makes to daily operations at all levels of an organization. Moving away from a disembodied and asocial study of firm assets, technologies and practices, the strategy as practice approach breaks down many of the traditional paradigmatic boundaries in strategy to investigate who the strategists are, what strategists do, how they do it and what the consequences or outcomes of their actions are. Including a number of detailed empirical studies, the handbook will be an essential guide for future research in this vibrant field. **Strategy as Practice** Paula Jarzabkowski, 2005-10-03 An important and extremely welcome addition to the strategic management field. In this book the author builds on the work of an emerging community of scholars to lay out theoretical and methodological underpinnings of an activity based framework for applying the practice lens to strategy. *Academy of Management Review* Paula Jarzabkowski has astutely signaled an agenda for future scholarship that will no doubt fuel the continued growth of this subfield. *Organization Studies* Pioneering work. As the first book in the new strategy as practice field it offers readers both innovative models and exemplary field research. Richard Whittington, Professor of Strategic Management, Saïd Business School, Oxford. Extends and develops the emerging fields of strategy and practice as well as activity theory. It also demonstrates empirically, using University settings, how activity theory is itself bounded by the wider contexts of organisation, embedded routines and the heavy hand of history. David C Wilson, University of Warwick. An insightful book that would be of use to people interested in the actual practices of strategy and strategizing. *Organization* Bridging the gap between what managers actually do and organizational strategies, this book provides an activity based framework for studying strategy as practice with empirical evidence to illustrate the dynamics of this framework in real terms.
