Susan O'Connell, John SanGiovanni, 2015-04-20

When math fact instruction is thoughtful and strategic it results in more than a student's ability to quickly recall a fact it cultivates reflective students who have a greater understanding of numbers and a flexibility of thinking that allows them to understand connections between mathematical ideas Susan O'Connell and John SanGiovanni In today's math classroom we want children to do more than just memorize math facts We want them to understand the math facts they are being asked to memorize Our goal is automaticity and understanding without both our children will never build the foundational skills needed to do more complex math Both the Common Core State Standards and the NCTM Principles and Standards emphasize the importance of understanding the concepts of addition and subtraction Susan O'Connell and John SanGiovanni provide insights into the teaching of basic math facts including a multitude of instructional strategies teacher tips and classroom activities to help students master their facts while strengthening their understanding of numbers patterns and properties Designed to be easily integrated into your existing math program *Mastering the Basic Math Facts* emphasizes the big ideas that provide a focus for math facts instruction broadens your repertoire of instructional strategies provides dozens of easy to implement activities to support varied levels of

learners stimulates your reflection related to teaching math facts Through investigations discussions visual models children s literature and hands on explorations students develop an understanding of the concepts of addition and subtraction and through engaging interactive practice achieve fluency with basic facts Whether you re introducing your students to basic math facts reviewing facts or providing intervention for struggling students this book will provide you with insights and activities to simplify this complex but critical component of math teaching Extensive online resources include customizable activities templates recording sheets and teacher tools such as multiplication tables game templates and assessment options to simplify your planning and preparation Over 450 pages of reproducible forms are included in English and Spanish translations A study guide for Professional Learning Communities and book clubs is also included Discover more resources for developing mathematical thinking at Heinemann com Math *Basic Math Facts Subtraction Do-Me Workbook*,2018-01-15 Congratulations on choosing Home Workbook for your child Parents and teachers agree that Home Workbooks help children learn the skills that they need to be successful in school Each book offers educational practice pages that are based on academic standards They are perfect for practice at home when traveling and during school breaks This worksheet presents subtraction problems that start with values as high as ten The answer to each problem will be determined by which numbers you want to subtract with so that the result is never below zero you want to subtract with so that the result is never below zero *Subtraction Facts Math Practice Worksheet Arithmetic Workbook with Answers* Shobha,2016-08-07 This book has more than 3100 subtraction facts for daily practice by students Each page has 2 different sets consisting of 18 problems each It is recommended for students to attempt 1 set daily for consistent practice Book starts with addition strategies to help students grasp basic concepts and get started Once students start gaining confidence in individual facts they can review their knowledge by solving mixed facts Book can be used to track practice time for each set Date and time can be recorded at top of each page Answer to each problem is given at the end of the book Knowing subtraction facts is helpful not only in academics we frequently use subtraction in our daily lives too Just like learning to walk before you can run learning subtraction and familiarizing yourself with numbers are building blocks for other math topics taught in school Mastering the basic math facts develops automaticity in kids Automaticity is the ability to do things without occupying the mind with the low level details that are required this is usually the result of consistent learning repetition and practice For instance an experienced cyclist does not have to concentrate on turning the pedals balancing and holding on to the handlebars Instead those processes are automatic and the cyclist can concentrate on watching the road the traffic and other surroundings Until students have developed sufficient sensory cognitive tools supporting access to symbolic memory they will not be able to image store or retrieve all of the basic facts with automaticity Therefore students need a comprehensive developmental and multi sensory structured system for developing automaticity with the facts **Basic Facts Worksheets** ,1989 [The Intended Mathematics Curriculum as Represented in State-Level Curriculum Standards](#)
