ECKM2014-Proceedings of the 15th European conference on Knowledge Management Carla Vivas,2014-10-01 The world economy in which we are living poses challenges that lead to a realization that more of the same will be difficult to sustain This provides an illustration that in order to create new or modified knowledge practices strengthen customer relationships and thus positively influence customer satisfaction organizations must be flexible in configuring combining knowledge and

knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus unlearning/forgetting becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning, and knowledge management. How can organizations tailor use and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management, KM, and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business management, and organization science, as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools, and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight, i.e. do not place considerable additional burden on users, and KM experts allow an incremental adoption, i.e. do not require large up-front investment before any return of investment is at least visible, and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge intensive organizations.
