Building Structures James E. Ambrose, 1993 Construction Details From Architectural Graphic Standards Eighth Edition Edited by James Ambrose A concise reference tool for the professional involved in the production of details for building construction this abridgement of the classic Architectural Graphic Standards provides indispensable guidance on standardizing detail work without having to create the needed details from scratch An ideal how to manual for the working draftsman this convenient portable edition covers general planning and design data sitework concrete masonry metals wood doors and windows finishes specialties equipment furnishings special construction energy design historic preservation and more Construction Details also includes extensive references to additional information as well as AGS's hallmark illustrations 1991 0 471 54899 5 408 pp Fundamentals of Building Construction Materials And Methods Second Edition Edward Allen A thoughtful overview of the entire construction industry from homes to skyscrapers there's plenty here for the aspiring tradesperson or anyone else who's fascinated by the art of building Fine Homebuilding Beginning with the materials of the ancients wood stone and brick this important work is a guide to the structural systems that have made these and more contemporary building materials the irreplaceable basics of modern architecture Detailing the structural systems most widely used today heavy timber framing wood platform framing masonry loadbearing wall structural steel framing and concrete framing systems the book describes each system's historical development how the major material is obtained and

processed tools and working methods as well as each system's relative merits. Designed as a primer to building basics, the book features a list of key terms and concepts, review questions and exercises, as well as hundreds of drawings and photographs illustrating the materials and methods described. 1990. 0 471 50911 6 803 pp. Mechanical and Electrical Equipment for Buildings, Eighth Edition. Benjamin Stein and John S. Reynolds. The book is packed with useful information and has been the architect's standard for fifty years. Electrical Engineering and Electronics, seventh edition. More up to date than ever, this reference classic provides valuable insights on the new imperatives for building design today. The Eighth Edition details the impact of computers, data processing, and telecommunications on building system design, the effects of new stringent energy codes on building systems, and computer calculation techniques as applied to daylighting and electric lighting design. As did earlier editions, the book provides the basic theory and design guidelines for both systems and equipment in everything from heating and cooling, water and waste, fire and fire protection systems, lighting, and electrical wiring, plumbing, elevators, and escalators, acoustics, and more. Thoroughly illustrated, the book is a basic primer on making comfort and resource efficiency integral to the design standard. 1991. 0 471 52502 2 1 664 pp. Masonry Structural Design. Richard E. Klingner, 2010-02-08. A Complete Guide to Masonry Materials and Structural Design. Written by the former chair of the Masonry Standards Joint Committee (MSJC), this authoritative volume covers the design of masonry structures using the 2009 International Building Code and the 2008 MSJC Code and Specification. Masonry Structural Design emphasizes the strength design of masonry and includes allowable stress provisions. Innovations such as autoclaved aerated concrete (AAC) masonry are also discussed. Real-world case studies featuring a low-rise building with reinforced concrete masonry and a four-story building with clay masonry illustrate the techniques presented in this comprehensive resource. Coverage includes basic structural behavior and design of low-rise bearing wall buildings; materials used in masonry construction; code basis for structural design of masonry buildings, including seismic design; introduction of MSJC treatment of structural design; strength design of reinforced and unreinforced masonry elements; allowable stress design of reinforced and unreinforced masonry elements; comparison of design by the allowable stress approach versus the strength approach; lateral load analysis of shear wall structure; design and detailing of floor and roof diaphragms. *Mechanics of Structures and Materials*.
