David Spence, 2006 Live saving advice is given for those at risk of their first stroke and those who have already had a mini stroke the 1 risk factor facing survivors *Stroke Prevention in Clinical Practice* Daryll M. Baker, 2007-12-10 Primary care physicians are the first to diagnose transient ischaemic attacks TIAs and are the doctors who can undertake a considerable amount of stroke prevention treatment This book fills the primary care physician s need for a short clear text explaining how to accurately diagnose a TIA determine what investigations are indicated and how and when to intervene to reduce the risk of stroke Short chapters are written in point form with clear diagrams and figures each chapter written by an expert in the field Stroke is a brain attack and a major cause of disability Active intervention can prevent stroke especially in high risk groups *Stroke Prevention* John W. Norris, Vladimir Hachinski, 2001-04-12 The

treatment of stroke remains ineffective and prevention is the key issue for this common disease Norris and Hachinski have recruited an international group of experts to provide a comprehensive critical review of the evidence on the primary and secondary prevention of cerebrovascular disease and to translate this information into clinical practice The authors present fresh information on established risk factors such as atrial fibrillation smoking and hypertension and on new risk factors such as homocysteinemia and the paradoxical role of alcohol They cover the protective effects of lifestyle changes diet exercise and estrogen Under secondary prevention they deal with aspirin antiplatelet therapy surgical measures to prevent stroke angioplasty and stenting and the importance of cardiac anomalies increasingly revealed by high definition imaging While endarterectomy remains controversial for asymptomatic carotid stenosis it has been clearly defined as the single most effective strategy in secondary prevention In a concluding section that will be particularly valuable to clinical readers the authors provide a lucid balanced discussion of how the findings from clinical trials where patients are highly selected closely monitored and given the highest standard of care can be effectively applied in the everyday practice of medicine

**Handbook of Stroke Prevention in Clinical Practice** Karen L. Furie, Peter J. Kelly, 2004-04-28 Despite major advances in the understanding of stroke mechanisms that have occurred over the past quarter century stroke continues to rank among the leading causes of death and disability worldwide Although currently it may be difficult to believe early doubts were expressed as to whether interventions in risk factors for either coronary disease or stroke would actually lead to a reduction in the incidence of these disorders However large clinical trials in hypertension carotid disease atrial fibrillation and antithrombotic and antiplatelet therapies have effectively demonstrated the efficacy of these targeted interventions in reducing stroke incidence More recently after earlier uncertainty regarding the role of elevated lipids as a risk factor for stroke clinical trials of the statins have also demonstrated a significant reduction in the incidence of ischemic stroke However as emphasized in *Handbook of Stroke Prevention in Clinical Practice* despite these gains and the initial decline in stroke incidence that did occur in the 1960s and 1970s the incidence of stroke disappointingly has failed to show a further significant decline since that time The editors of *Handbook of Stroke Prevention in Clinical Practice* raise the very important question of whether recognized strategies for stroke prevention have been widely or effectively implemented They correctly emphasize the critical importance of identifying the mechanism of stroke in each patient so as to properly direct prevention and treatment As Dr [Stroke Prevention, Treatment, and Rehabilitation](#) David Spence, Henry JM Barnett, 2012-05-13 IF YOU WANT TO UPDATE THE INFORMATION ON YOUR TITLE SHEET THEN YOU MUST UPDATE COPY IN THE PRODUCT INFORMATION COPY FIELD COPY IN THE TIPSHEET COPY FIELD DOES NOT APPEAR ON TITLE SHEETS This book arms any physician with the evidence and tools they need to help patients who have had or at risk of having a stroke in preventing stroke Market Audience PRIMARY Neurologists 18 000 in US Cardiologists 30 000 in US SECONDARY Internists 200 00 About the Book Stroke is the third leading cause of death in the US with cardiac disease and cancer being number one and
