The Famine Plot:

The Famine Plot Tim Pat Coogan, 2012-11-27 During a Biblical seven years in the middle of the nineteenth century Ireland experienced the worst disaster a nation could suffer Fully a quarter of its citizens either perished from starvation or emigrated with so many dying en route that it was said you can walk dry shod to America on their bodies In this grand sweeping narrative Ireland's best known historian Tim Pat Coogan gives a fresh and comprehensive account of one of the darkest chapters in world history arguing that Britain was in large part responsible for the extent of the national tragedy and in fact engineered the food shortage in one of the earliest cases of ethnic cleansing So strong was anti Irish sentiment in the mainland that the English parliament referred to the famine as God's lesson Drawing on recently uncovered sources and with the sharp eye of a seasoned historian Coogan delivers fresh insights into the famine's causes recounts its unspeakable events and delves into the legacy of the famine mentality that followed immigrants across the Atlantic to the shores of the United States and had lasting effects on the population left behind This is a broad magisterial history of a tragedy that shook the nineteenth century and still impacts the worldwide Irish diaspora of nearly 80 million people today **The Famine Plot** John Freivalds, 1980 [Summary of Tim Pat Coogan's The Famine Plot](#) Everest Media, 2022-05-16T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The British government was responsible for the state of Ireland and it was their mismanagement that produced the terrible conditions there The mere fact that Ireland was so miserable was a complete and irrefutable proof of the mismanagement to which she had been subjected 2 The Famine killed millions of people in Ireland and it was also the cause of emigration Ireland became a country to leave 3 The first attempt at colonization of Ireland was made by the Normans who were invited to Ireland by the Irish king Diarmuid McMurragh The pope of the day Adrian granted Henry II a Papal Bull legitimizing the Norman invasion The Irish were to be saved from the barbarity of their ways by a combination of Vatican directive and Norman steel 4 The Battle of the Boyne in 1690 marked the end of Catholic power in Ireland and it is still celebrated by the Protestants of northeastern Ireland The pope sought a Williamite victory and he contributed some three and a half million in today's euro values toward the purchase of swords and muskets to use against the Catholics [Blood in the City](#) Richard D. E. Burton, 2018-10-18 The Terror of 1793 94 the Paris Commune of 1871 the Dreyfus Affair explosions of violence punctuated French history from the start of the Revolution until the Liberation at the close of World War II The distinguished scholar Richard D E Burton here offers a stunningly original account of these outbursts concluding that recourse to political violence was not occasional and abnormal but rather the usual pattern in French history Instead of adhering to conventional chronological lines Blood in the City is structured topologically around a number of major Parisian sites of memory including Place de la Concorde Sacr Coeur and the Eiffel Tower For thirty years Burton has visited and revisited Paris criss crossing the streets on foot and lived with great nineteenth and twentieth century literary depictions of the city Drawing on historical literary visual anthropological and

psychological sources he develops a wide ranging account of violence in modern French politics In so doing he provides powerful insights into political violence scapegoating the idea of sacrifice and the widespread French obsession with conspiracy Burton demonstrates that time and again the same basic scenario has been acted out on the streets of Paris one or more people would be singled out from the community and imprisoned exiled or more often subjected to violence by the crowd or the state In particular he explores how Catholicism in its extreme ultrareactionary form shaped the worldviews of Parisians and how the killing of a sacrificial victim came to be seen as a reenactment of the crucifixion of Christ

The Fountain of Privilege Hilton L. Root, 2024-06-04 *The Fountain of Privilege* applies contemporary economic and political theory to answer long standing historical questions about modernization In particular it contrasts political stability in Georgian England with the collapse of the Old Regime in France Why did a century of economic expansion rupture France's political foundations while leaving those of Britain intact Comparing the political and financial institutions of the two states Hilton Root argues that the French monarchy's tight control of markets created unresolvable social conflicts whereas England's broader power base permitted the wider distribution of economic favors resulting in more flexible and efficient markets This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1994

Unhappy the Land Liam Kennedy, 2015-10-26 In *Unhappy the Land* Liam Kennedy poses fundamental questions about the social and political history of Ireland and challenges cherished notions of a uniquely painful past Images of tragedy and victimhood are deeply embedded in the national consciousness yet when the Irish experience is viewed in the larger European context a different perspective emerges The author's dissection of some pivotal episodes in Irish history serves to explode commonplace assumptions about oppression victimhood and a fate said to be comparable only to that of the Jews Was the catastrophe of the Great Famine really an Irish Holocaust Was the Ulster Covenant anything other than a battle cry for ethnic conflict Was the Proclamation of the Irish Republic a means of texting terror And who fears to speak of an Irish War of Independence shorn of its heroic pretensions Kennedy argues that the privileging of the gun the drum and the flag above social concerns and individual liberties gave rise to disastrous consequences for generations of Irish people Ireland might well be a land of heroes from C chulainn to Michael Collins but it is also worth pondering Bertolt Brecht's warning Unhappy the land that is in need of heroes

[Massacre at the Champ de Mars](#) David Andress, 2013 The massacre exposed the widely differing ways in which post Revolutionary Parisians construed the word patriotism and why the great Revolutionary goal of political unanimity was so elusive On 17 July 1791 the revolutionary National Guard of Paris opened fire on a crowd of protesters citizens believing themselves patriots trying to save France from the reinstatement of a traitor king To the National Guard and their political superiors the protesters were the dregs of the people brigands paid by counter

revolutionary aristocrats Politicians and journalists declared the National Guard the patriots and their action a heroic defence of the fledgling Constitution Under the Jacobin Republic of 1793 however this massacre was regarded as a high crime a moment of truth in which a corrupt elite exposed its treasonable designs This detailed study of the events of July 1791 and their antecedents seeks to understand how Parisians of different classes understood patriotism and how it was that their different answers drove them to confront each other on the Champ de Mars David Andress is Professor of Modern History at the School of Social Historical and Literary Studies University of Portsmouth *The Famine Plot Persuasion in Eighteenth-century France* Steven L. Kaplan,1982 This is a print on demand publication The French Revolution seethed with rumors of plots instigated by various groups from aristocrats to brigands Many of the rumors had to do with the food supply especially with grain from which the vast majority of Frenchmen derived most of their nourishment These were called famine plots by which was meant a secret machination to starve the people in order to achieve certain ends Like many attitudes practices associated with the Revolution the famine plot persuasion was a way of making sense of the world that was deeply rooted in the collective consciousness the material moral political environment of the old regime When there was a serious protracted disruption of the normal grain bread supply consumers found reasons to question the authenticity of the dearth The conviction grew that the crisis had been contrived that there was a criminal conspiracy afoot against the people that popular suffering was needless that the plotters somehow had to be resisted This study examines the dearths of 1725 1726 1738 1741 1747 1751 1752 the crises of 1765 1770 1771 1775 **Coastal Environments in the West of Ireland** John B. Roney,Mark Beekey,2022-11-16 This multi authored study explores how the natural sciences and the humanities together can understand the connections between the natural environment the built environment and the cultural heritage of communities along the west coast of Ireland Knowledge of the sea and marine life and what they mean to humanity is dependent on both scientific study and local knowledge which in turn can lead to a greater commitment to sustainability Until the 1950s there was little government support for scientific research nor an interest in helping fisheries beyond near shore catch Irish fisheries remained small underfunded and had difficulty accessing international markets However as this book shows Ireland s cultural heritage demonstrates a deep appreciation for the coastal environment and a sense of place This is preserved in the Irish language in poetry story and music and in the ways the Irish lived with an often wild coastal topography *The Journal of the Bombay Natural History Society* Bombay Natural History Society,1915 Globalization, Environmental Change, and Social History Peter Boomgaard,Marjolein 't Hart,2011-02-24 Throughout all ages the activities of mankind have weighed heavily upon the environment In turn changes in that environment have favoured the rise of certain social groups and limited the actions of others Despite this environmental history has remained a blind spot for most social and economic historians This is to be regretted as the various and unequal effects of environmental change often explain the strengths and weaknesses of certain social groups irrespective of their being defined along the lines of class gender and ethnicity This

volume brings together the expertise of social and environmental historians in an effort to assess the extent to which transnational agents changed socioecological space as a consequence of globalization since the Late Middle Ages

Krause, 2000-07-05 William Carleton Ireland's great but overlooked nineteenth century writer has for the past 150 years been denigrated as a failed novelist but is here redeemed by David Krause's in depth study of all his significant novels Carleton employed techniques similar to the multi voiced carnival where oral folk tradition combines sacred with profane and the great with the insignificant and mock heroic version of pastoral where comic characters make profound remarks and whose actions have unanticipated great effects Through his novels Carleton illuminated the exploitation of Irish lands by indifferent British authorities and rackrenting Anglo Irish landlords and subsequent famine and holocaust Krause's recognition of this ignored author of Irish fiction is a valuable addition to the field of Anglo Irish literary studies **The French Revolution**
