field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The total of 88 contributions included in the VAMR proceedings were carefully reviewed and selected for inclusion in this two volume set The papers included in this volume are organized in the following topical sections developing augmented and virtual environments interaction in augmented and virtual environments human robot interaction in virtual environments and presence and tele presence healthcare and medical applications virtual and augmented environments for learning and education business industrial and military applications culture and entertainment applications
